Old Main

General Information

HISTORY

The University of Scranton, the first Catholic institution of higher education in the Northeastern counties of Pennsylvania, was known as the College of Saint Thomas at its foundation in 1888. Under the laws of the State it was chartered on January 12, 1924, to confer Bachelor's and Master's degrees in the Arts and Sciences. Fourteen years later Saint Thomas College became the University of Scranton. In 1942 the University of Scranton became the

twenty-fourth of the twenty-eight colleges and universities in the United States under the direction of the Society of Jesus.

LOCATION

The University of Scranton, an urban institution, is situated in the City of Scranton. The Old Main Building, containing some administrative offices, Graduate Division classrooms and the Library, is located at 331 Wyoming Avenue in center city. At the same location are LaSalle Hall, a residence for faculty, and the Scranton Preparatory School.

The New Campus of the University is located at Linden and Monroe Avenue, about six blocks away from the old site. This is the area of the Scranton Estate, the former home of the Scranton family and a generous gift of Mr. Worthington Scranton to the University. Loyola Hall of Science, a new modern science building, was opened here in December 1956. In the same area are to be found the Jesuit Faculty Residence, the Business Building, the Arts Building and the Student Center. At Linden Street and Quincy Avenue four new student dormitories were opened in September 1958.

A new Student Center Building is currently under construction. This building will replace present facilities. A new Library Building and an Administration Building are also being constructed on the grounds of the Scranton Estate.

THE OBJECT AND PURPOSES OF THE UNIVERSITY

The University of Scranton, as one of the family of 28 colleges and universities administered by the Society of Jesus throughout the United States, shares with them their common educational objectives.

The principal objective of the University is: (1) to lead the student to understand and to inspire him to fulfill that complex of dignities and responsibilities which Man is, as a person and as a member of human society, under God; (2) harmoniously to develop all his powers of soul and body, under the influence of Divine Grace, by methods of teaching which will form habits of correct and vigorous thinking, and of courageously effective and virtuous acting.

Specifically, as the university in this community, the University of Scranton has as its purpose to prepare its students to be thoughtful and effective citizens serving their community in careers in the medical, legal and educational professions, in business, industry and commerce, in social and governmental services, as members of the clergy, in communication arts, and in science and research.

Toward the attainment of this end, the University requires that its undergraduate candidates for degree complete studies in language, literature, history and the natural sciences, and fulfill disciplines in scholastic philosophy and theology,* as a necessary cultural foundation upon which study in special fields may be built.

The method of attaining its objective is based upon the *Ratio Studiorum*, the Jesuit Code of Liberal Education, which was first adopted in 1599 after more than thirty years of co-operative experiment and study, and thereafter thoroughly revised from time to time to meet changing needs and conditions, notably in 1832, in 1893, in 1930 and most recently in 1948. This method provides for: (1) clear-cut organization of successive objectives to be obtained by the student; (2) frequent occasion for stimulating the student to organize in his own mind the knowledge he has thus far gained; (3) prevention of any attitude of passivity or mere absorption, by the use of objection and discussion as an essential part of the teaching technique; (4) continual urge to self-expression in accordance with the ideals of intellectual and moral order; (5) personal interest in the student, spurring him on and encouraging him to do his individual best to acquire both learning and virtue.

RELIGIOUS TRAINING

No matter how solid and thorough the intellectual training of the student it needs to be supplemented by an equally complete training in religion and morality if education is to fulfill adequately its function of perfecting human nature and thus preparing the student for a fruitful life after leaving college. The more highly trained a man is, the greater his potentialities for good or

*Theology required of Catholic students only.

evil; and consequently the more important the role of religion with its incomparable power to instruct the conscience and to strengthen the will in the ways of private, social and civic virtue.

One of the phases of religious training at the University consists in formal instruction, given during class periods, as an integral part of the curriculum. Since religious truths form a body of doctrine that can be taught and studied as exactly and scientifically as other branches of human knowledge, the courses in religion are conducted as regular lecture courses with recitations and examinations. The courses are so distributed over the four years of college that the entire field of Christian dogma and morals is adequately surveyed.

In addition to the courses in religion, obligatory for all Catholic students, the growth of a spirit of manly piety is encouraged by voluntary participation in various religious devotions and practices. Holy Mass is celebrated in the Chapel; Benediction of the Blessed Sacrament, Devotions to the Sacred Heart and to Our Blessed Lady and other liturgical functions are held at frequent intervals. All Catholic students are expected to receive the Sacraments frequently, weekly and even daily when possible, and to make the exercises of a three day retreat which is held annually.

In the admission of students no discrimination is made on the grounds of religious belief. Students, not of the Catholic faith, are exempted from attending classes in religion and from participating in religious exercises conducted by the University, though they may attend them if they so desire.

THE COUNSELING PROGRAM

One of the characteritic features of Jesuit colleges for many years has been the Student Counselor. His principal duty is to direct the spiritual activities of the University, and the various religious organizations associated with it. He is, in a special sense, the friend and adviser of the students, not only in religious matters but, also, in their social duties and in other personal concerns.

THE GUIDANCE DEPARTMENT

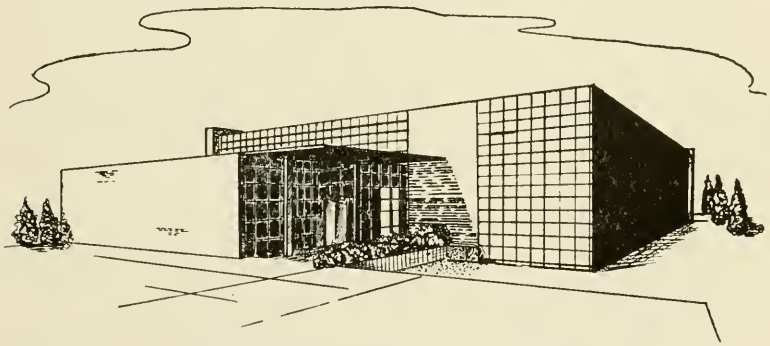
This Department was instituted as a service to the students, to the Faculty, to the Student Counselor, and the Administration,

whenever there should be need of its facilities. The Department is staffed by competent, professionally trained men.

The Guidance Department offers a counseling service on educational, vocational, and personal matters. Students are tested and counseled on their aptitude for college work, on their correct placement in the curriculum, on their reading techniques; they are advised on their capabilities for professional studies, such as, law, engineering, journalism, medicine, etc.; their study habits are diagnosed, arranged into patterns of activity, and remedied, when necessary.

Part of the Department's specialized work involves a diagnostic and remedial reading course for those who either want to enlarge their acquaintance with a wider range of reading techniques, or for those who have had little training thus far, and need to acquire facility for the intense college reading program. Special help is offered also to students suffering from speech defects.

The Department also offers, on a limited scale, testing and counseling services to business and industrial firms in the city.



The Library (under construction)

THE LIBRARY

The Library of the University of Scranton serves the students and the faculty in instructional matters and in research through the existing collection of the main library and a special collection including many spiritual works housed at the Scranton Estate, 4 Ridge Row. Books from this special collection are available through loan at the main library.

Established in 1926, the library has a collection of more than 56,000 volumes and upwards of 400 literary, scientific and professional periodicals are currently received. In addition to the University Library, the students may use the resources of the Scranton Public Library and other college libraries in the area.

The staff of well trained librarians is prepared to give individual and informal instruction, so that any student with a special research problem may receive efficient service. It is highly recommended that all students should be aware of the educational and cultural value derived from a thorough acquaintance with the Library collection and tools.

The Library, located on the third floor of the Main Building, is open daily during the Fall and Spring semesters from 8:30 A.M. to 9:30 P.M., Monday to Thursday; 8:30 A.M. to 5:00 P.M., Friday; and on Saturdays from 9:00 A.M. to 3:00 P.M. The Library is closed on Sundays and officially designated school holidays.

BEST SELLERS

The Library of the University of Scranton edits and publishes *Best Sellers*, a book-reviewing service. The purpose of this review is to assist individuals as well as libraries in making an intelligent selection of modern literature. The Reviewing Staff is composed of experts in the various fields of writing and is drawn from more than thirty colleges and universities in the country.

RESERVE OFFICERS TRAINING CORPS

The Department of the Army approved the establishment at the University of Scranton of a Branch General Unit of the Reserve Officers Training Corps in September, 1951. It consists of a four-year program with basic courses in the first two years and advanced courses in the last two years. The primary objective of the R.O.T.C. system of education is to qualify selected students to be commissioned reserve officers in the Army of the United States.

Every physically qualified student, who has not completed two years of active duty with some branch of the armed forces, is required to enroll in the basic course, where he may learn the fundamentals of intelligent citizenship and be given such general

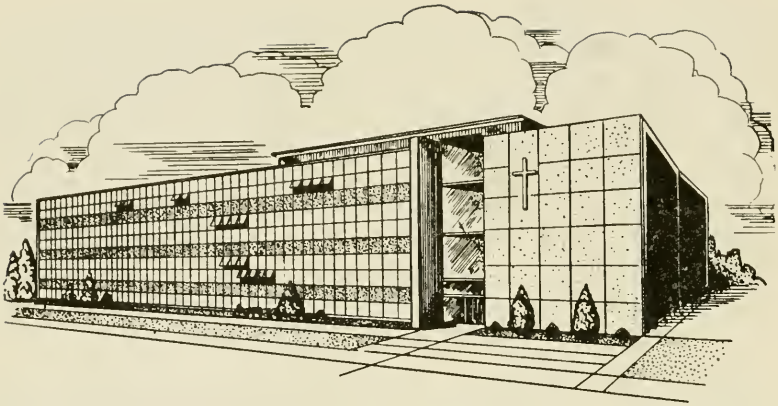
basic military training as will benefit him and the service when he becomes a member thereof, and finally to afford him a means for practical training in organization, leadership and discipline which will be of value to him in his career. Enrollment in the advanced course is optional. Two credits per semester toward a degree are allowed for basic training and three credits per semester are allowed in the advanced courses. Full particulars concerning the program will be furnished by the Professor of Military Science and Tactics.

PLACEMENT BUREAU

The Placement Bureau was established to render service to all University of Scranton students and alumni who register with the Bureau. Undergraduates and alumni registrants are given every possible assistance in finding satisfactory employment. From time to time, especially during the spring term, employment officers of large corporations arrange through the Placement Bureau to come to the University to interview Seniors with regard to prospective positions with their organizations.

RADIO STATION WUSV

The University of Scranton operates its own non-commercial educational FM broadcast station, WUSV, licensed by the FCC for broadcast on Channel 210, 89.9 mc. WUSV began broadcast operations on October 1, 1950, and has been in continuous operation since. In the autumn of 1956 WUSV moved into new quarters in the penthouse atop the new Science Building on the Scranton Estate, to resume broadcasting with increased power and antenna height. The station operates on a six hour daily schedule beginning at 5:00 P.M.



Loyola Hall of Science — 1957

Admission to the University

In the acceptance of candidates, final decision rests with the Board of Admissions. Candidates are advised that in determining applicant's acceptability the Board will consider the high school record and general ability of the candidate and also such factors as character, personality and leadership potential. It will be to the candidate's advantage to make formal application early in his senior year of high school. At the very latest, application should be made by July 15. Application forms may be secured by writing to the Dean of Admissions, The University of Scranton, Scranton 10, Pa. A fee of $5.00 is chargeable on application.

SCHOLASTIC CREDENTIALS

Candidates for admission to the freshman class must present: 1) a certificate of graduation from a senior high school accredited by the State Department of Education of Pennsylvania or by the Middle States Association of Colleges and Secondary Schools or other recognized regional accrediting body; and 2) a detailed transcript of their high school work.

ENTRANCE TESTS

All applicants will be required to submit to entrance tests to be used by the Board of Admissions in evaluating their qualifications for their desired course of study. These tests are only one factor used in determining admission to the University. Of equal importance is the relative standing in the applicant's high school class, the nature of the high school program taken, and the recommendations of principals and high school guidance officers.

The Scholastic Aptitude Tests conducted by the *College Entrance* Examination Board, Box 592, Princeton, N. J., should be taken by the applicant in December or January of the senior year in high school.[1] Achievement tests in *English, Intermediate Mathematics*[2] and the *Modern Foreign Language* studied in High School should be taken in March of the senior year in high school. These tests are also conducted by the College Entrance Examination Board. Students should make arrangements to take these tests at least one month in advance of the scheduled testing date. Please request that the results of these examinations be sent to the Dean of Admissions, University of Scranton, Scranton 10, Pa. The Admissions Department offers pre-college counseling to all applicants.

UNIT REQUIREMENTS FOR ADMISSIONS

To enroll in any of several undergraduate curricula offered by the University, a total of sixteen or more units covering grades 9-12 must be presented. The term "unit" is understood to represent a secondary school course of from four to five hours weekly throughout an academic year of thirty-six weeks duration. A schedule of unit requirements and preferred distribution of secondary school courses is given in the following table.

---

1 Applicants living within the area of Scranton, have the option of taking either the College Entrance Examination Board Examinations or the special entrance examinations conducted by the University of Scranton. The applicant should notify the Dean of Admissions of their choice.

2 Students desiring to major in science of engineering, who have had three or more years of college preparatory mathematics should substitute the Advanced Mathematics test for the Intermediate Mathematics Test.

HIGH SCHOOL UNITS	COLLEGE CURRICULUM CHOICE					
	ARTS		SCIENCE OR ENGINEERING		BUSINESS, EDUCATION OR SOCIAL SCIENCE	
	Required	Preferred	Required	Preferred	Required	Preferred
English	4	4	4	4	4	4
History and Social Science[1]	2	3	2	3	2	3
Classical Languages[2]	2	2+	0	2+	0	2+
Modern Foreign Language[3]	2	2+	2	2+	2	2+
College Preparatory Mathematics[4]	2	3+	3	4	2	3+
Science[5]	1	2+	1	2+	1	2+
Electives[6]	3		4		5	
TOTAL	16+		16+		16+	

1 History and Social Studies include units in World History, Ancient History, Medieval History, Modern History, Civics, Economics, Problems of Democracy, Social Science. Economics is a preferred subject for students applying for Business Administration. One unit of American History is normally required.

2 Classical Languages—Students applying for the non-classical Bachelor of Arts Degree may be exempted from the requirement of 2 units of Classical Language if the other units they present are sufficient to compensate for this lack. Students undertaking the Classical Arts Program who have had only two years of secondary school Latin must begin with Latin 3-4. Students who have completed four years of Latin in high school begin with Latin 21. The inclusion of Classical Greek in the high school program is encouraged.

3 Modern Foreign Language requirements — Candidates without secondary school credit in a modern foreign language may be accepted for admission provided they have 16 acceptable academic units. However they must register in one of the elementary courses and continue their study of the language during sophomore year. Such students will have to attend one summer session to bring their schedule into adjustment. A single year of a language will not be counted as a unit to satisfy the requirements for admission.

At the beginning of the freshman year a placement test for admission to the intermediate course is given to students offering two or more units of high school credit in a modern foreign language. Students failing in this test are required to take the elementary course. College credit for the elementary course will be granted only to those students who are beginning the language in college.

ADMISSION WITH ADVANCED STANDING

At the discretion of the Board of Admissions credits earned at other accredited colleges will be honored, provided a grade of "C" or its equivalent is presented and the content of the courses offered conforms to the requirements of the University of Scranton. No one, however, will be admitted to a standing higher than that represented by the completion of the junior year. To be eligible for a degree a year of residence is required. Students entering from other institutions shall be required to make up curricular subjects prescribed in the course which they are to follow at the University of Scranton.

The candidate must present a transcript indicating honorable dismissal and particulars of past academic achievement signed by the proper college authority. In case the character of a student's work in any subject is such as to create doubt as to the quality of that which preceded, the University explicitly reserves the right to revoke any and all credit assigned on credentials and to exact examination in the same subject.

German is the preferred language for candidates for the sciences and mathematics. Students planning post-graduate work on attaining the Bachelor's Degree are advised that French and German are the languages usually required of candidates for advanced degrees.

4 College Preparatory Mathematics include Elementary Algebra, Intermediate Algebra, Advanced Algebra, Plane Geometry, Solid Geometry and Trigonometry. Courses in related mathematics, general mathematics, consumers mathematics, etc., will not be recognized as fulfilling the requirements for admission to the University. In the Pre-Engineering, Chemistry, Physics-Electronics or Mathematics Courses the mathematics requirement must include Trigonometry.

5 Science includes courses in Biology, Chemistry and Physics but not General Science. In Pre-Engineering the science course preferred is Physics. In other science programs the preference is for Chemistry. General Science may be considered as an elective, provided one of the other specific sciences is included also.

6 Electives should be from academic subject matter courses and may include any of the following.

Ancient History	1	Greek	2 to 3
Medieval History	1	Modern Foreign Language	2 to 4
Modern History	1	Mechanical Drawing	1 only
Civics	1	Business Subjects	1 only
Economics	1	College Preparatory Mathematics	2 to 4
Problems of Democracy	1		
Social Science	1		

The Board of Admissions will not consider as candidates for advanced standing students who are on probation in another institution of higher learning or who have been dismissed from such an institution for unsatisfactory performance or by disciplinary action.

ADVANCED PLACEMENT

Applicants who have taken advanced college level courses during their secondary school career may be given advanced placement or advanced placement and credit in those subjects at the discretion of the Board of Admissions. Students who have been accepted for admission and desire to apply for such advanced placement should take the advanced placement examinations offered by the College Entrance Examination Board, Princeton, N. J.

EARLY ADMISSION

At the discretion of the Board of Admissions, outstanding secondary school students who demonstrate sufficient maturity may be admitted to the University after the completion of junior year in high school. Students who are so admitted will be granted the high school equivalent diploma by the Department of Public Instruction, Harrisburg, Pennsylvania, upon completion of their freshman year of college. Such applicants should present a minimum of 15 acceptable high school units on application.

General Regulations

Students of the University of Scranton, both on campus and off campus, are expected to manifest respect for order, morality, personal honor and the rights of others, which are the sign of a gentleman and the duty of a good citizen. Unbecoming conduct as well as insubordination, continued inapplication to studies or irregularity in attendance will constitute grounds for dismissal from the University.

The Administration reserves the right to dismiss at any time, and without making public the reason, any student who conducts himself contrary to the standards of the University or, in the opinion of the University authorities, fails to make proper use of the opportunities offered to him.

LATENESS AND ABSENCE

1. *Lateness:* Students will not be admitted to class after the bell signalling the beginning of the class.
2. *Absence:* Regular attendance is one of the most important obligations of the student. Absence beyond twelve percent of classes or laboratories in any course, or absence totalling more than double the number of credits in a given course, will cause the student to be withdrawn from the course or courses and a failure will be recorded in each case.
   a. The above allowance for absence is considered sufficient to cover all extraordinary causes for absence such as illness, death in the family and the like.
   b. Students are not excused from attending class even in the interest of a recognized school activity unless such permission has been given in advance by the Dean of Studies. Application for such permission must be presented to the Dean of Studies in writing and signed by the Moderator of the Activity. It is the policy of the University that such permission rarely be given.
   c. Students who incur the penalty for absenteeism have the right to appeal to the Board of Discipline. The decision of the Board of Discipline as approved by the Dean of Studies is final.

PROPER ATTIRE

Dress proper to the occasion is a hallmark of a gentleman and at the same time an important factor in his formation. At the University of Scranton proper attire includes coat and tie.

PARKING

Certain areas of the campus are reserved for faculty parking. Students may not park in these areas. The grounds of the Scranton Estate also constitute a restricted area. Students who park in these areas are subject to action by the Board of Discipline.

GRADING SYSTEM

Final grades are determined by the instructor on the basis of the student's homework, recitations, tests and final comprehensive examination. The standing of students at the quarter is to be ascertained from the instructor. Deficiency warnings will be mailed at the quarter to students doing unsatisfactory work.

All students are required to pass a comprehensive examination in each subject at the close of each semester.

The system of grading is based on the letters A, B, C, D, E and F. These letters are evaluated according to the following scale:

A	indicates not only high achievement, but also a high degree of intellectual iniative and creative work	3 quality points for each credit hour
B	indicates attainment above the average	2 quality points for each credit hour
C	indicates medium or average attainment	1 quality point for each credit hour
D	indicates attainment below average but passing	0 quality points for each credit hour

E — Conditioned Failure. This grade is assigned to a student who, in the opinion of and at the discretion of the instructor and after having completed all semester exercises, narrowly fails to achieve a passing grade; or to the student who, after achieving a passing average in all other semester exercises narrowly fails to achieve a passing grade in the final examination. It is a temporary grade, and after a single condition examination will be

replaced on the record by a final grade indicating that the student has passed satisfactorily or that his failure is complete. The highest mark on the condition examination is D. However, the semester grade may be higher. The condition grade must be removed within two weeks from the end of the semester.

F — Complete Failure, with no privilege of re-examination and with the obligation of repeating the course if permitted to remain in attendance.

WX — Withdrew before judgment could be formed.

WF — Withdrew failing.

WP — Withdrew passing.

Inc — Course requirements incomplete. The incomplete grade must be removed by completion of the remaining requirements by the end of the semester after which it has been incurred.

QUALITY OF WORK

A grade average of "C," or a quality point index of 1.0 is required for graduation.

The quality point index of a student is determined by dividing the total number of quality points earned by the total number of credits attempted.

A semester hour of credit represents one hour a week for one semester except when a class period is conducted in the style of a conference or seminar, in which case fewer credits are granted. Two or more hours of laboratory work are counted as the equivalent of one lecture period.

HONOR STUDENTS

To be eligible for honors a student must carry the full program of his class. All semester hours in which a student receives a grade are counted in the determination of honors. In order to be listed as honor students a grade of "B" or higher must be earned in each subject. Names of honor students are placed on the "Dean's List" which is published each semester.

DEFICIENCIES

No student will be classified as a Senior who has not removed all deficiencies or who has not earned the necessary number of

quality points. Any member of the Senior Class who incurs one failure or two conditions shall cease to be a candidate for a degree at the next commencement.

A student who has accumulated three failures at the end of a semester shall be dismissed.

RECOMMENDATIONS AND HONORS

1. Favorable recommendations for the purpose of advanced studies will not be issued to any student who does not maintain a quality point average of 1.5 or better in his major field.
2. Honors at graduation are conferred under the following regulations:
   a. To be eligible students must have completed a minimum of 100 hours of work at the University of Scranton.
   b. Honor Averages:

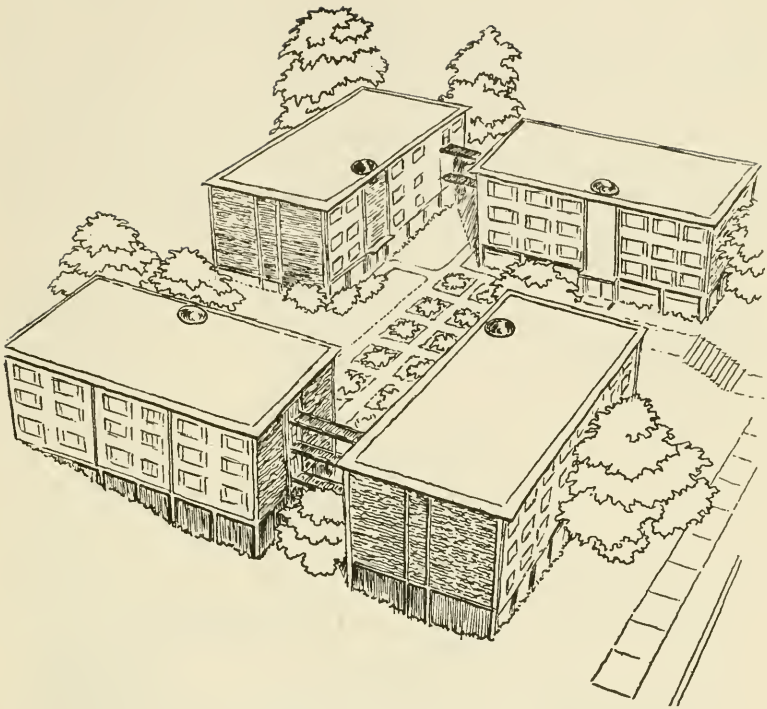
Summa Cum Laude	A quality point average in all subjects of 3.0
Magna Cum Laude	A quality point average in all subjects of 2.5
Cum Laude	A quality point average in all subjects of 2.0

WITHDRAWAL FROM THE UNIVERSITY

A student who withdraws voluntarily from the University of Scranton will be granted an honorable dismissal only under the following conditions:

1. He must not already be liable to dismissal for deficiencies, excessive absence, or misconduct.
2. He must discuss his intention with the Dean, and if so instructed, must submit the request for withdrawal in writing from his parents or guardian.
3. He must have settled all financial accounts with the University.

When a student is granted honorable dismissal, he may request refund of tuition, laboratory fees, and board and room fees, according to the schedule given on page 32. The withdrawal will be effective as of the date on which the notice is received from the parent or guardian.



Residence Halls — 1958

Residence Halls

Residence Halls for out-of-town students are provided on campus. All such students are obliged to live in these residences, An exception to this requirement will be made in the case of those out-of-town students who will be living with relatives in Scranton while attending the University. Permission to live outside the residence halls must be obtained from the Dean of Men before the beginning of the school year.

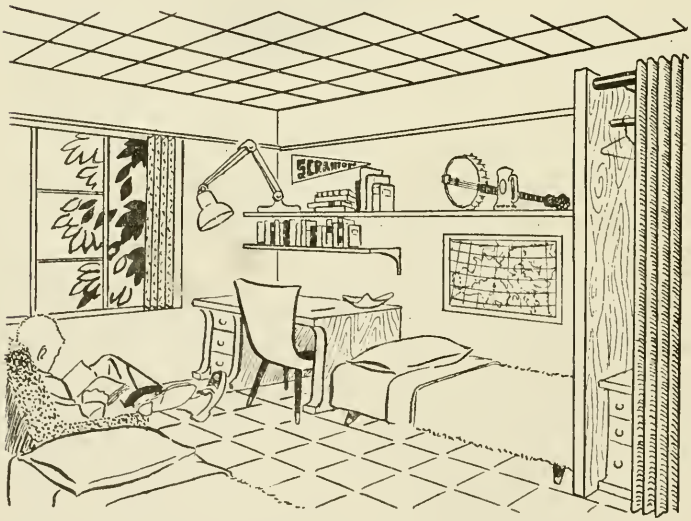
The Residence Hall fee is $287.50 per semester. This is to be paid in advance either by the semester or for the full year. This fee provides for room for the full week and for breakfast and dinner Monday through Friday in the University Cafeteria.

Students who remain on campus over the week-end may obtain their meals in any of several restaurants located within walking distance of the University. All inquiries about residence halls should be directed to the Dean of Men.

Students desiring to reserve space in one of the residence halls, must make a room reservation deposit before May 1. This deposit is $50.00 and is not refundable but is applicable to room and board.

Fees listed for residence facilities do not cover the times of calendar vacations. Students are expected to vacate their room at these times.

"YOUR ROOM, SIR!"



SCHEDULE OF OCCUPANCY FOR RESIDENCE HALLS

1959 - 1960

September 6	Freshmen occupy their rooms by 8 P.M.
September 11-12-13	Freshmen on retreat.
September 13	Upperclassmen occupy their rooms by 3 P.M.
September 13	Registration for upperclassmen who live in residence halls, 3-6 P.M.
November 26-28	Students may remain on campus but cafeteria facilities will be closed.
December 17	Rooms are to be vacated by 7 P.M. for Christmas Holidays.
January 3	Rooms are to be reoccupied by 8 P.M.
January 23	Semester vacation—rooms to be vacated by 7 P.M.
January 31	Students are to report for reoccupancy of rooms by 3 P.M.
	Special registration for all out-of-town students, 3-6 P.M.
April 13	Easter Holidays—rooms to be vacated by 7 P.M.
April 24	Rooms to be reoccupied by 8 P.M.
June 6	Residence halls close for summer at noon.

1960 - 1961

September 5	Freshmen occupy their rooms by 8 P.M.
September 9-10-11	Freshmen on retreat.
September 11	Upperclassmen occupy their rooms by 3 P.M.
	Registration for upperclassmen who live in residence halls, 3-6 P.M.
November 24-26	Students may remain on campus but cafeteria facilities will be closed.
December 15	Rooms are to be vacated by 7 P.M. for Christmas Holidays.
January 3	Rooms are to be reoccupied by 8 P.M.
January 23	Semester vacation—rooms to be vacated by 7 P.M.
January 29	Students are to report for reoccupancy of rooms by 3 P.M.
	Special registration for all out-of-town students, 3-6 P. M.
March 28	Easter Holidays—rooms to be vacated by 7 P.M.
April 9	Rooms to be reoccupied by 8 P.M.
June 5	Residence halls close for summer at noon.

Student Expenses

Summary of Tuition and Fees

Day Sessions

Tuition per semester (including registration fee)	$320.00
Ordinary Fees	
*University Fee, per semester	25.00
Special Service Fees	
Late Registration Fee	10.00
Change of Schedule after registration	3.00
Condition Examination (per course)	5.00
Laboratory Fees	
Science and Engineering Laboratory, per semester	15.00
Accounting Laboratory, per semester	5.00
Statistics Laboratory, per semester	10.00
Education and Psychology Laboratory, per semester	5.00
Breakage Fees	actual
For Seniors Only	
Graduation Fee	45.00

Unless explicitly stated otherwise, Tuition and Fees are payable in advance on Registration. No student shall be permitted to receive any degree, certificate or transcript of record, until his financial account with the University has been satisfactorily settled. Students are responsible for all breakage in the laboratories.

---

*The University Fee includes charges made to support student personnel services, admission to athletic events, subscription to the *Aquinas* and *Esprit*, etc.

The tuition charge permits a student to carry the number of credit hours as indicated for his course and year on pages 32 to 46 of this catalog. Additional credit hours are chargeable at the rate of $20.00 per semester hour of credit. Students whose combined number of credit hours total twelve (12) or more in Day Sessions or in combination of Day and Evening Sessions shall be charged full tuition and fees. Full time day students who have permission to take additional courses in Evening Sessions will be charged at the rate of $20.00 per semester hour of credit for all courses taken. The written permission of the Dean is always required to take courses in both Day and Evening Sessions.

MONTHLY PAYMENTS

We are glad to offer the convenient NORTHEASTERN NATIONAL TUITION PLAN for those parents who prefer to pay tuition, board and room, and other fees in equal monthly installments. The following plans are available at the cost indicated:

One Year Plan	(8 payments)	4% more than cash price
Two Year Plan	(20 payments)	5% more than cash price
Three Year Plan	(30 payments)	6% more than cash price
Four Year Plan	(40 payments)	6% more than cash price

The Two, Three and Four Year Plans include Parent Life Insurance for qualified parents. This insurance coverage provides funds for the estimated cost of the remaining period of schooling covered by the contract, if the parent or guardian who has signed the contract dies. A descriptive pamphlet will be sent upon request.

All contracts made in behalf of students enrolled in Day Sessions must be signed by a parent or guardian.

The NORTHEASTERN NATIONAL TUITION PLAN is optional and offered solely as a convenience.

REFUNDS

No refund may be demanded as a matter of right when a student leaves the University without completing the semester in which he was engaged. If, however, his withdrawal is authorized for a good cause and if he has honorable dismissal, he may request in writing a refund of tuition, board and room fees and laboratory fees, according to the following schedule. Ordinary and special service fees are not refundable.

Period of Attendance	*Refund*
First Semester	
To September 22	80%
To September 29	60%
To October 6	40%
To October 13	20%
Beyond October 13	no refund
Second Semester	
To February 9	80%
To February 16	60%
To February 23	40%
To March 2	20%
Beyond March 2	no refund

College Degrees

The College of Arts and Science at the University of Scranton awards two academic degrees, the Bachelor of Arts and the Bachelor of Science. All programs, following the tradition of the liberal arts, call for a distribution of courses among the principal areas of learning and a significant penetration into each of these principal areas.

BACHELOR OF ARTS DEGREE

Students seeking the Bachelor of Arts degree may choose from two basic programs. The first program emphasizes the classical tradition and is characterized by a two-year study of Latin Literature. Students pursuing this course may major in the Classical Languages, English, Modern Foreign Languages, History, Philosophy, Political Science, Economics, Mathematics, Psychology or Sociology.

The alternate program emphasizes the study of literature and is characterized by a two-year study of the literature of a modern foreign language. Students pursuing this course may major in English, Modern Foreign Languages, History, Philosophy, Political Science, Economics, Mathematics, Psychology or Sociology.

BACHELOR OF SCIENCE DEGREE

The curricula which lead to the degree of Bachelor of Science fall into four general groups.

Natural Science. The degree programs in the natural sciences are designed for students who wish to major in the fields of Biology, Chemistry, Physics, Electronics or Mathematics.

Social Science. The degree programs in the social sciences give a broad training in the various fields of the social sciences and allow a concentration in the major fields of History, Political Science, Economics, Psychology and Sociology.

Education. The degree programs in education seek to give the student a firm foundation in the liberal disciplines, depth of

content in the subject matter fields for which he is preparing and training in classroom methodology. Students are prepared for teaching in either the elementary or secondary schools.

Business Administration. The degree programs in business administration seek to give the student a firm foundation in the liberal disciplines, a strong grasp of economic principles, accounting, finance, management and marketing. A student may major in accounting, management or statistics. Other major concentrations are possible by special arrangement.

PRE-ENGINEERING PROGRAM

In addition to the degree programs offered at the University, a pre-enginering curriculum is available. This is a two-year course designed to enable the student to transfer to an engineering school to complete his degree. Through an arrangement with the University of Detroit, students completing the pre-engineering program may transfer to their cooperative engineering course. In all cases of transfer the usual requirement of "C" grades or better will be required.

OTHER PRE-PROFESSIONAL PROGRAMS

Students desiring to prepare for law school are advised that any degree program offered by the University will be suitable. Especially recommended is the Bachelor of Arts program with a concentration in History, Political Science or Economics. For those interested in Tax Law, an accounting major is appropriate.

The Bachelor of Science curriculum with a major in Biology is the normal preparation for medical or dental school. Students who desire to take a Bachelor of Arts degree may have a special program arranged whereby they may meet the science requirements of such professional schools.

DEGREE REQUIREMENTS

To receive the Bachelor's degree a student is required to complete successfully all prescribed courses in the curriculum for which he has registered. The curriculum tables beginning on page 32 list the courses required for each curriculum.

Certain courses are prescribed for all curricula. These include courses in English, mathematics and the sequence of philosophy courses. Each student must complete a year of Intermediate Modern Foreign Language, continuing the study of the language started in high school. Where a student is permitted to take an elementary language course, he will be required to take the intermediate course in his sophomore year. In all curricula one year of history is prescribed as well as a year of natural science.

Catholic students are required to pursue a course in Theology in each of the four years; non-Catholic students must take an equivalent number of credits in elective subjects to substitute for Theology.

Participation in the basic ROTC is required of all physically fit students who have not served two years of active duty in the Armed Forces of the United States.

CHOICE OF A MAJOR FIELD

Before the close of his sophomore year each student with the assistance of his faculty advisor and the approval of the Dean must determine his major elective for the ensuing two years. However, the field of concentration for students desiring to major in science or prepare for medical school is normally determined at the end of Freshman year.

Curriculum Tables

BACHELOR OF ARTS

Classical Curriculum

Major in Classical Languages

Department and No.	*Descriptive Title of Course*	*Credits Fall*	*Spring*

Religious Organizations

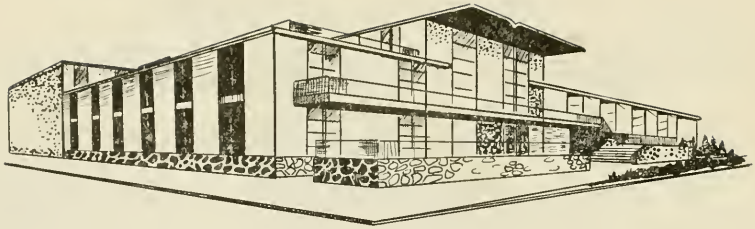
LEAGUE OF THE SACRED HEART

The League of the Sacred Heart and Apostleship of Prayer is the oldest organization at the University of Scranton; it was founded in 1906 and at that time aggregated to the central office of the League. Membership is open to all Catholic students. The League has for its purpose to foster among its members a sincere devotion to the Sacred Heart and, by the union of its members in prayer, to make reparation for sin and promote the apostolic work of the Church.

THE SWORDSMEN

The Swordsmen (The Sodality of Our Lady), under the primary title of the Immaculate Conception and with Saint Ignatius as its secondary patron, was founded at the University of Scranton on December 6, 1942, with the approval of the Bishop of Scranton and subsequently aggregated to the Roman Prima Primaria Sodality. Its object is to foster filial devotion to the Mother of Christ and the practice of virtue and piety among its members.

They conduct the Annual Mission Bell Dance for the benefit of the Jesuit Missions in India, Burma and Chile. They sponsor the May Devotions held on the campus. They operate a pamphlet rack., teach catechism in parishes around Scranton, and act as promoters of the League of the Sacred Heart and the Apostleship of Prayer. They keep the students informed of the pictures approved by the Legion of Decency.



Student Center (under construction)

College Organizations

PURPOSE

The University of Scranton encourages extracurricular organizations as important factors in collegiate life, developing the social side of a student's character, exercising his abilities and furnishing opportunities for the development of initiative and leadership. These activities are part of the life of the collegiate community and ought to be part of the life of every student. Therefore, every student will be urged to participate in one or more of these activities to the extent that his scholastic standing will permit.

ALPHA SIGMA NU

Alpha Sigma Nu is a National Honor Society with chapters in various Jesuit Colleges and Universities throughout the United States. It is a society organized to honor students who have distinguished themselves in scholarship, service and loyalty to their college. Candidates are drawn from the Junior Class and are nominated by the local chapter, which also certifies the qualifications of the nominees. Those who are approved by the President of the University and the Dean are elected members and initiated into the organization.

ALUMNI SOCIETY

The University Alumni Society has been formed to perpetuate friendships formed at the University, to foster among its members a spirit of loyalty to their Alma Mater and to extend the influence and advance the interests of the University. Regular meetings and reunions are held from time to time as prescribed in the rules and by-laws of the Society.

THE AQUINAS

The Aquinas is a newspaper published twice a month during the course of the school year by the students of the University. Its purpose is to foster the development of literary expression among the students, to afford a practical training in Journalism and to chronicle the events of University life.

ATHLETIC ASSOCIATION

General Policies

The University of Scranton engages in intercollegiate athletics because of a deep conviction that when properly administered they are an integral part of the total educational services of the institution. The University encourages and offers the opportunity of participation in intercollegiate athletics to all students. The academic life of the boy is, however, of primary importance. The University of Scranton abides by both the statement of policies and principles and the rules of eligibility of the N.C.A.A. and the E.C.A.C. for the conduct of intercollegiate athletics.

Objectives

1. To improve students physically and develop qualities of leadership.

2. To bind together the student body, stimulate school spirit and instill into the student a desirable sense of loyalty.

3. To integrate the athletic program with the general public relations of the University.

4. To arrange and play an intercollegiate schedule commensurate with Scranton's size, academic standards, aspirations and principles and policies.

5. To integrate the athletic program with the general University program so that there is a balance between the focus of attention on athletic events and the focus of attention on other types of events.

THE ART CLUB

The Art Club fosters an appreciation of the fine arts. The members sponsor exhibitions and concerts, and hold studio periods for exploring the various art media.

THE AVIATION CLUB

The purpose of this club is to increase the knowledge of and interest in aviation, and to promote social contact among the students having a common interest in aviation. The Aviation Club functions throughout the school year and is open to all interested students.

THE UNIVERSITY BAND

The University Band is open to any student with an aptitude for music. The band plays at many of the athletic contests, various University exercises and gives an annual concert. Active members in the band are eligible for the school letter after one year and the gold award after two years.

BIOLOGY CLUB

This organization enables students majoring in Biology and more intensely interested in the Biological Sciences to extend their education beyond the limits permitted by classroom work. Students meet, at least twice monthly, for discussion of current biological problems; guest speakers are invited; movies are shown; social affairs are conducted; *Bioscript* is published twice yearly for the benefit of students and alumni; members engage in various projects for the benefit of the department, school and community.

THE BUSINESS CLUB

The Business Club, composed of graduates and students who are interested in Business Administration and Accounting, affords its members closer contacts with actual business practices and acquaints them with both local and national business executives and firms. Meetings are held each week and each month a dinner meeting is held at which prominent guest speakers from the field of business are presented to the club. Field trips to local and distant industries are another activity of this organization.

CHEMISTRY CLUB
UNIVERSITY OF SCRANTON CHAPTER
Student Affiliates, American Chemical Society

To keep abreast of developments and improve their perspective in the ever-growing field of chemistry, undergraduates in the

chemistry major curriculum became affiliated with the American Chemical Society, a national professional organization, thereby gaining recognition collectively as the University of Scranton Chapter of Student Affiliates.

Objectives of the organization are: to encourage in the broadest and most liberal manner the advancement of chemistry in all branches; to promote research in chemical science and industry; the improvement of the qualifications and usefulness of chemists through high standards of professional ethics, education and attainments; the increase and diffusion of chemical knowledge; and by its meetings, professional contacts, and reports to promote scientific interests and inquiry.

COUNCIL OF DEBATE

The University of Scranton Council of Debate offers its members the opportunity to train themselves in public speech and informal debate. Besides the regular weekly debate at the University, the debaters present a program each Thursday over Station WEJL, in which they discuss topics of vital interest to the world. Other activities of the Council of Debate are intercollegiate debates and the annual oratorical contest. The Council is a member of the National Forensic Commission.

DEUTSCHER KREIS

The Deutscher Kreis is open to all students at the University who are particularly interested in increasing their proficiency in the use of the German language and in acquiring a better understanding of the culture and civilization of the people whose language they are studying.

THE ECONOMICS CLUB

This organization restricts its membership to students who are majoring in Economics. Its objective is to promote interest in economic theory and problems by providing the opportunity for discussion groups to function most profitably. In addition, the group sponsors field trips and conducts economic research projects of general as well as of local interest.

UNIVERSITY OF SCRANTON CHAPTER

Student Education Association of the Pennsylvania State Education Association

The Student Education Association is an undergraduate Education Club for future teachers at the elementary and secondary school levels. It is a professional organization affiliated with the Pennsylvania State Education Association and has as one of its objectives the professional betterment of the present and future teacher. The Club also offers the Education student closer contact with teaching and school practices than can be afforded in the classroom, as well as an opportunity to become personally acquainted with distinguished educators.

LE CERCLE FRANCAIS

Le Cercle Francais is open to all students of the University who are particularly interested in increasing their proficiency in the use of French language and in acquiring a better understanding of the culture and civilization of France.

In its bi-weekly meetings, the club's activities stress the importance of French culture and literature in the development of Western civilization. The Cercle encourages the exchange of letters with French correspondents, sponsors guest speakers and conducts contests for students of French in the high schools of the Area.

THE GREEK CLUB

The Greek Club is an academic organization open to all the students of the University. Its purpose is to acquaint its members with various phases of Greek culture in their relationship to present-day civilization. The club affords a fine opportunity of supplementing one's education with a study of the rich culture of ancient Greece, the cradle of Western civilization.

THE LOYOLANS

The Spanish Club is an organization composed of students of the University who are interested in the study of Spanish. The objectives of the club are to acquaint the members with the writ-

ten and spoken language and to study the life, literature and culture of the Spanish-speaking countries.

Meetings are held monthly in the Arts Building. Several social gatherings are held during the scholastic year. The annual Spanish Fiesta is the organization's outstanding social event of the year.

UNIVERSITY OF SCRANTON CHAPTER

Society for Advancement of Management

The University of Scranton Chapter of the Society for Advancement of Management is an organization composed of students of the University who are interested in Business Administration and in particular, Management. The specific purpose of this Society is through research, discussion, publication, and other appropriate means to conduct and promote scientific study of the principles governing organized effort in industrial and economic life, and in general to advance the science of management for the benefit of society as a whole.

Meetings are held each week in the Business Building. Monthly dinner meetings are held in conjunction with other members of the Northeastern Pennsylvania Chapter, at which prominent guest speakers in the field of management are presented, providing the membership with an opportunity for personal contact with local and national business executives. Other private functions are conducted regularly.

RESIDENT STUDENTS' CLUB

Founded in 1947, this club is designed to aid the student from out of town in supplementing the regular extracurricular activities at the University with special programs of an intellectual, artistic or social nature to meet his special needs.

THE PERSHING RIFLES

The Pershing Rifles is a national ROTC society with member companies in various colleges and universities throughout the United States. The society was formed at the University of Nebraska in 1892 by Lt. John J. Pershing from whom the society has since taken its name. The aims of the society are to encour-

age, preserve and develop the highest ideals of the military profession and to promote American Citizenship. Membership is open to ROTC cadets who have the necessary scholastic, drill, and leadership ability.

THE PHILOSOPHY CLUB

The Philosophy Club was established as the outgrowth of informal gatherings of students interested in philosophical subjects. Informal discussions are held at the club meetings as a means of helping the members acquire a knowledge of and a facility in speaking about philosophical subjects. While any interested student of the University may become a member, practically all members are Juniors or Seniors, since the philosophy courses are given in those years.

THE PHYSICS CLUB

The Physics Club is primarily an organization for those students who are majoring in the science of Physics. The membership is also open to those who are studying Physics and wish to extend their understanding of this science. The purpose of the Physics Club is to afford the members opportunities to become more familiar with the activities of physicists, the applications of physical principles and the outstanding developments in the field of physics.

UNIVERSITY PLAYERS

The Undergraduate Dramatic Society of the University of Scranton is the University Players, under whose sponsorship the program of University Dramatic Productions on stage and radio is presented. Membership in the University Players is restricted to students who have taken active part in the annual productions on stage and radio. Freshmen serve as apprentice members during their first year. Actual participation in the program of productions, however, is not limited exclusively to members of the University Players, but is open to all students of the University Day and Evening classes. Meetings of the University Players are held twice monthly and consist of a planned program of lectures and discussions on playwriting, stagecraft, production and design.

POLITICAL SCIENCE CLUB

The Political Science Club is composed of students who are actively interested in the nature, functions, and problems of American government. It conducts seminars on current issues, instructs area high school students in parliamentary procedure, sponsors model legislatures for these students as experimental laboratories for the analysis of state and national problems. The emphasis is on active student initiative and participation in projects which have major political concern.

The club is affiliated with Citizenship Clearing House whose goal is the encouragement and participation of college students in partisan politics. It is also a member of the Intercollegiate Conference on Government which is composed of representatives from all major institutions of higher learning in the Commonwealth of Pennsylvania. Each year the Conference sponsors a meeting of its units, usually in Harrisburg, where the students simulate model legislatures, model constitutional or nominating conventions. In addition joint meetings with other northeastern colleges are sponsored by the club.

The club is also affiliated with the International Relations Clubs of the Carnegie Foundation for International Peace and conducts joint meetings with the International Relations Clubs of area colleges.

THE PSYCHOLOGY CLUB

The Psychology Club affords an opportunity for students majoring in psychology, and others interested in the problems of the field, to meet periodically. Meetings generally feature guest speakers, psychological films or demonstrations, field trips, etc. At least one dinner meeting is held annually. The club maintains an up-to-date file of approved graduate schools in psychology, and publishes a mimeographed newsletter of club activities. Only psychology majors may hold office, but any students are welcome as members.

THE UNIVERSITY SINGERS

The University Singers affords students with sufficient vocal talent an opportunity to develop this talent with practice in choral

singing. During the year the University Singers appear in connection with various University exercises and give occasional concerts. Active members in the Glee Club are eligible for the school letter after one year and the gold award after two years.

SOCIAL SCIENCE CLUB

The purpose of this organization is to afford students an opportunity to participate in recreational and group activities with institutionalized children and adults; to perform sociological research of benefit to the community; to broaden the student's training in the social sciences.

STUDENT COUNCIL

The management of extracurricular and social activities at the University is placed in the hands of the Student Council. The range of its duties includes the preparation of the social calendar, the running of assemblies, the supervision of elections, the initiation and promotion of all kinds of student endeavor and the observance of college traditions.

THE WINDHOVER

The Windhover is the annual Year Book publication of the students of the University. Its aim is to serve as a record of the school year and as a memorial of the Senior Class.

THE RADIO GUILD

The University of Scranton operates its own non-commercial educational FM broadcast station, WUSV, which recently moved into newly designed and equipped studios atop the new Science Building. Fully equipped with modern broadcast equipment, including auxiliary amplifiers and recorders for remote pick-ups, the radio station serves as the focal center of the Radio Guild, a student organization which staffs and operates the station as announcers and engineers under faculty direction. Students serving on the Radio Station are selected by examination after apprenticeship training and find this extracurricular experience a valuable training facility for communications work. Full membership in the Radio Guild entitles the student to wear the lapel insignia of WUSV.

Financial Assistance

The University of Scranton, which serves Lackawanna Valley and the counties of Northeastern Pennsylvania, annually disperses considerable financial assistance to outstanding students with proven financial need. This assistance is distributed on the basis of financial need, academic achievement and demonstrated qualities of leadership. All grants unless otherwise stated are for one year only. Students must reapply each year.

COMPETITIVE SCHOLARSHIPS

The University of Scranton offers ten (10) scholarships to high school graduates of the highest ability and achievement. These scholarships range in value from $800 to $2200 and are awarded on the basis of the secondary school record, the principal's recommendations and on the results of competitive examinations. The ten scholarships are distributed as follows:

2 four-year scholarships worth $550 a year, total value $2200 each

2 four-year scholarships worth $300 a year, total value $1200 each

6 four-year scholarships worth $200 a year, total value $800 each

The retention of these scholarships is conditioned upon the maintenance of a B average.

TYPES OF FINANCIAL ASSISTANCE AVAILABLE

Direct Scholarship Grants

Martha Fitch Scholarship Fund

Through the generous charity of the late Miss Martha Fitch, former superintendent of nurses at Thomson Hospital, a scholarship fund was established to provide financial assistance for talented young men.

Agnes and Mary Murphy Scholarship Fund

The late Misses Agnes and Mary Murphy, former teachers in the Scranton School District, left a bequest to be used to assist in defraying the tuition expenses of students attending the University of Scranton.

Purple Club Scholarships

The Purple Club, founded in 1932, has been instrumental in providing for the education of over two hundred students. It has collected and spent $110,500 for this purpose. Over 2500 interested citizens are members of the organization and have enabled the club in 1958 to contribute $12,650 providing financial assistance for sixty-two students at the University of Scranton.

Unico Club Scholarship

The UNICO Club of Scranton annually provides one four-year scholarship with a total value of $2200 to a boy from Lackawanna County. Students are chosen on the basis of scholastic achievement and need.

Ted V. Rodgers Scholarship

A scholarship valued at $600 a year for four years has been given by the American Trucking Association in honor of Ted V. Rodgers, Sr.

Burke Foundation Scholarships

Two scholarships valued at $600 per year for four years are awarded annually through the gift of William and Thomas Burke and the Burke Family Foundation of Pittsburgh.

NATIONAL DEFENSE STUDENT LOAN FUND

The National Defense Education Act of 1958 provides that a student with proven financial need may borrow what is necessary to finance his education within the limits of funds available. Repayment and interest at 3% begin one year after the student terminates his studies and continues for ten years thereafter. The act provides for cancellation of 10% of the loan plus interest for each year of teaching in the public elementary or secondary schools. The maximum cancellation is 50%. It also provides for cancellation in the event of death or permanent disability. In all cases *special consideration* will be given to applicants who *desire to teach in elementary and secondary schools* and to those students whose academic background indicates superior capacity or preparation in *science*, *mathematics*, *engineering*, or a *modern foreign language*. In no case may a student borrow more than $1000 in a single year.

CAMPUS WORK OPPORTUNITIES

Tuition aid in amount up to one-half tuition is granted for work done in various departments of the University by assigned students. Over seventy such opportunities are provided annually.

QUALIFICATIONS NEEDED FOR FINANCIAL ASSISTANCE

General Academic Qualifications

Financial assistance will be granted only to full-time undergraduate students who are in good standing at the University. Applicants for the freshman class must rank high in their secondary school classes; students currently enrolled must maintain a high quality point index.

Evidence of Financial Need

The primary and most essential condition of an applicant's eligibility is that he is in need of the requested assistance in order to complete his course of study. The committee on student aid will evaluate the financial circumstances of both the applicant and the applicant's family. This is the purpose of the application form. In all cases it is expected that the student's family make a reasonable contribution to the applicant's education in the light of its income, assets and financial responsibilities; that the student, through his own earnings and part-time and summer employment make a similar contribution. In view of the expected financial return which a college education brings with it, applicants should be willing to borrow to finance this education. The amount of aid granted will be limited to that sum required to enable the applicant to pursue his course of study. In all cases the number of grants is limited by the availability of funds.

Leadership Qualifications

Evidence of significant participation in extra-curricular and co-curricular activities together with scholastic achievement will be considered in the awarding of all forms of student assistance.

TO WHOM ARE APPLICATIONS FOR FINANCIAL ASSISTANCE TO BE MADE? All applications are to be made to the *Chairman of the Committee on Student Aid, University of Scranton, Scranton 10, Pa.*

WHAT IS THE FINAL DATE FOR SUCH APPLICATIONS. *April 15.*

IS THERE A SERVICE FEE CONNECTED WITH APPLICATION? In the case of renewal applications a service fee of two dollars is charged to cover clerical costs and the costs of financial investigation of the applicant and his family. In the case of new applications the fee is $4.

GIFTS AND BEQUESTS

Gifts to the University may take the form of funds for the establishment of scholarships or professorships; or the foundation of medals and other prizes; of additions to the material equipment; of collections of educational value; of contributions to the general fund, or may be undesignated. Those desiring to make a bequest to the University of Scranton may be helped by the following suggested form:

FORM OF BEQUEST

I give (devise) and bequeath to the University of Scranton, an institution incorporated under the laws of the Commonwealth of Pennsylvania and located in Scranton, Pennsylvania, and its successors forever the sum of .....dollars (or otherwise describe the gift) for its general corporate purposes (or name a particular corporate purpose).

Courses of Instruction

DEPARTMENT OF FINE ARTS

Mr. Mann, Mr. Gallagher

The Courses in Fine Arts are designed to fulfill a two-fold purpose: 1) to provide instruction in applied art for students desirous of learning to draw and paint and for those who seek professional advancement in commercial art; 2) to provide a cultural background, appreciative and historical, affording a knowledge of canons for criticism and enjoyment, for students of all courses.

Art 5. *Art Appreciation* — *2 credits*

A survey course devoted to the interpretation and appreciation of architecture, sculpture and painting. Aegean civilization. Greece and Rome. Early Christian and Byzantine art. Romanesque and Gothic art.
Fall 1960

Art 6. *Art Appreciation* — *2 credits*

A continuation of Art. 5. Renaissance architecture and sculpture. Italian schools of painting. Baroque art. Painting in the Low Countries and England. French painting from classicism to post-impressionism. Modern painting illustrated by cubism, non-objectivism, expressionism and surrealism.
Spring 1961

Art 7. *Music Appreciation* — *2 credits*

Introduction to elements and forms. Analysis and interpretation of selected works. Survey of music before Bach.
Fall 1959

Art 8. *Music Appreciation* — *2 credits*

Historical survey from Bach to the present day. Additional unit on music in America.
Spring 1960
(For other Art courses, confer the Evening Sessions' Catalog.)

DEPARTMENT OF BIOLOGY

Dr. Wolf, *Chairman*; Mr. Callaghan, Dr. Evans

Courses in the Department of Biology are designed to achieve the following objectives: 1. To further the general education of the individual by presenting the fundamental facts and concepts which are needed for an understanding of the living world and his relations to it. 2. To train the individual in analytical thinking and to acquaint him with the operation of the "scientific method." 3. To develop habits of precision, accuracy, curiosity, critical evaluation, neatness and patience together with skill in laboratory techniques. 4. To prepare students for professional schools such as those of Medicine, Dentistry and allied fields or for advanced study or work in other biological fields.

To major in biological sciences the following courses are required:

Chemistry 1-2; 22; 101-102

Mathematics 13-14

Physics 1-2

Biology 1-2; 21-22; 103-and 105 with at least eight elective credits taken from Biology 23; 104; 120; 121; 124; 125. Students preparing for research in the basic pre-clinical sciences are advised to add Mathematics 21-22 and Chemistry 123-124.

Biol. 1 & 2. *General Biology* *8 credits*

This course includes a comprehensive study of representatives of the major plant and animal phyla from the standpoint of structure, function, development and relationships. It also considers such general biological principles as the nature and origin of life, the organization of living beings, the problems of heredity, development and evolution. It is the equivalent of one semester courses in General Botany and General Zoology. 2 hours lecture and 4 hours lab each semester.

Fall and Spring each year

Biol. 3 & 4. *General Biological Sciences* *6 credits*

This is a cultural course in which general biological principles and problems are emphasized especially as they affect the human race and in relation to human problems. It covers, in less detail, the same subject matter as the preceding course and aims at the inculcation of a more generalized knowledge of the major biological principles. Demonstrations are used extensively to supplement laboratory work. 2 hours lecture and 2 hours lab each semester.

Fall and Spring each year

Biol. 21 & 22. *Comparative Vertebrate Anatomy* *8 credits*

The gross anatomy and phylogeny of the organ systems in the vertebrate organism are considered with special emphasis given to the mammal. Insofar as possible, structure is correlated with function. Type animals of the major vertebrate groups studied and dissected in the laboratory include, shark, necturus, turtle, pigeon and cat. 2 hours lecture and 4 hours lab each semester. Prerequisite: Biol. 1 & 2.

Fall and Spring each year

Biol. 23. *Genetics* *4 credits*

The purpose of this course is to give the student a fundamental knowledge of the basic principles and modern theories of heredity as developed by experimental, biometrical and cytological methods. Consideration is given to the practical application of the laws governing inheritance in the fields of plant and animal breeding and human heredity. 2 hours lecture and 4 hours lab. Prerequisite: Biol. 1 & 2 or 3 & 4.

Spring each year

Biol. 101. *Advanced General Biology* *4 credits*

A course in advanced general biological principles considering in more detailed fashion the significance of the basic morphology and physiology of the cell as the unit of a living organism.

Spring 1960

Biol. 103. *Histology* *4 credits*

This course is concerned primarily with the microscopic structure and the functioning relations of vertebrate tissues and organ systems with most attention devoted to the mammal. 2 hours lecture and 4 hours lab. Prerequisite: Biology 21 and 22.

Fall 1959

Biol. 104. *Microtechnique* *4 credits*

A course of training in the preparation of animal and plant tissues for microscopic examination. General methods of preparing histological specimens are covered in detail with special techniques included as time and interest permit. 1 hour lecture and 6 hours lab. Corequisite: Biology 103.

Fall 1960

Biol. 105. *Embryology* *4 credits*

A large part of the course is devoted to the early stages of development where reproduction, gametogenesis, fertilization, cleavage and the processes of morphogenesis are treated from the comparative viewpoint. The development of organs and organ systems is then studied chiefly as it occurs in frog, chick and pig. 2 hours lecture and 4 hours laboratory. Prerequisite: Biol. 21 & 22.

Spring 1960

Biol. 120. *General Physiology* *4 credits*

This course considers mainly the basic physiological processes and principles underlying the functioning of the animal organism. It deals with the physics and chemistry of protoplasm, with enzymes, irritability, excitation, conduction, contractility and integration. Some attention is given to the functioning of the major organ systems in the mammal. 2 hours lecture and 4 hours lab. Prerequisites: Biol. 21 & 22, Chem. 101 & 102, Phys. 1 & 2.

Fall 1959

Biol. 121. *Bacteriology* *4 credits*

Presented from the biological rather than the medical viewpoint, this course deals with the structure, function, growth, reproduction and relationships of bacteria, yeasts and molds. A brief survey of the pathogens is included together with an introduction to the principles of immunology. 2 hours lecture and 4 hours lab. Prerequisites: Biol. 21 & 22, Chem. 101 & 102, Phys. 1 & 2.

Spring 1960

Biol. 124. *Undergraduate Research and Thesis* *Variable credit*

Reserved for advanced students with satisfactory preparation in the biological and physical sciences who are desirous of acquiring methods in biological

research. The subject of the problem, time and credits are to be arranged individually. Prerequisites: 20 credits in Biology, Chemistry 101-102, Physics 1-2.
Offered on request

Biol. 125. *Fundamentals of Parasitology* *4 credits*
This course is concerned with the classification, structure, reproductive life cycles and host relationships of the most common parasites of the major animal phyla. Diseases, methods of control and treatment in relation to parasitic conditions of vertebrates will be stressed. 2 hours lecture and 4 hours laboratory. Prerequisites: Biol. 21 & 22, Chem. 101 & 102.

DEPARTMENT OF BUSINESS ADMINISTRATION

Dr. Senker, *Chairman*; Mr. Buckley, Mr. Charnogursky, Mr. Donovan, Mr. Houlihan, Mr. Katorkas, Mr. McGrail, Mr. McLean, Mr. O'Malley, Mr. Zandarski

The courses in Business Administration are designed to achieve the following objectives:

1. To develop the cultural, intellectual and moral qualities of the student through an intensive study of cultural subjects and business problems.

2. To teach the student to think clearly and logically, and to develop his application of the analytical approach in solving current business problems.

3. To encourage individuality of thought and expression by the student, and thereby develop future civic and industrial leaders.

4. To impart a training for executive positions in the business world by the study of Accounting, Law and theoretical as well as applied Economics; to serve as a preliminary training for those wishing to enter the field of Law itself; and to intensively train those wishing to enter the field of public or private accounting.

5. To give preliminary training to those students who wish to pursue graduate courses in business.

The following courses are required of all Business majors: Mathematics 7-8 or 13-14; Economics 23-24; Business 1-2; 5-6; 25-26; 103-104; 105-106; 126-7.
In addition Accounting majors must take Business 21-22; 101-102; 120-121; 122-123.
Majors in Business Statistics will take Business 173; 174 or 165; 175; 107 and Mathematics 31, Biology 3-4.
Majors in Business Management will take Business 107-108; 170, 171, 172, Biology 3-4.

Bus. 1. *Elementary Accounting I* *4 credits*
Meaning and purpose of accounting. Development of the accounting equation. Detailed study of the balance sheet and profit and loss statement. The ledger record of business activities. Account and ledger technique, including complete bookkeeping procedures. Adjustments. The journal and its subdivisions. Special journals, their problems and expansion. Ledger subdivision and control

accounts. Business papers, the first record of business transactions. Negotiable instruments. The worksheet and summary statements. Completing the ledger record. 4 hours lecture and 5 hours laboratory.
Fall each year

Bus. 2. *Elementary Accounting II* *4 credits*
Partnership formation and operation. Division of profits. Financial statements of a partnership. Methods of admitting a new partner. Partnership dissolution and liquidation. Organization and operation of the corporation. Detailed study of classification and accounting techniques for capital stock, bonds, mortgages, sinking funds and reserves. Corporate financial statements and their preparation. Changing from a partnership to a corporation. The voucher system. Accounting for the manufacturing concern. Departmental accounting. Inventory valuation and control. Analysis and interpretation of financial statements. 4 hours lecture and 5 hours laboratory. Prerequisite: Bus. 1.
Spring each year

Bus. 5. *Business Law—Contracts* *2 credits*
Introduction to the study of Law. Its nature, administration and the various tribunals. Nature of a contract. Statutory and case law principles of contracts. Formation of a contract by offer and acceptance. Consideration. Capacity of parties. Unenforceable contracts. Statute of Frauds. Performance of contracts—conditions and excuses for non-performance. Rights of third parties. Assignments.
Fall each year

Bus. 6. *Business Law—Negotiable Instruments* *2 credits*
Statutory and case law principles of Negotiable Instruments. Types of negotiable instruments. Issuance and negotiation of promissory notes, drafts and checks. Holders in due course. Rights and liabilities of parties to negotiable instruments. Sales of personal property. Passage of title, risk of loss and seller's warranties. Rights and remedies of unpaid seller. Prerequisite: Bus. 5.
Spring each year

Bus. 21. *Intermediate Accounting I* *2 credits*
A continuation of first year accounting and its application in more complex business situations. Comprehensive study of the fundamental accounting processes. Current assets and non-current assets. Detailed analysis of content and preparation of corporate balance sheets. 2 hours lecture and 3 hours laboratory. Prerequisite: Bus. 2.
Fall each year

Bus. 22. *Intermediate Accounting II* *2 credits*
A continuation of Accounting 21. Comprehensive study of liabilities, capital stock and surplus. Errors and their correction. Statements from incomplete

data. Statement analysis, special ratios and their measurement. Statement of application of funds. 2 hours lecture and 3 hours laboratory. Prerequisite Bus. 21.
Spring each year

Bus. 25. *Business Law—Agency and Partnership* *2 credits*
Statutory and case law principles of Agency and Partnerships. The creation of the agency relationship. Rights, duties, powers and liabilities of principal, agent and third parties in relation to each other. Partnership characteristics. Rights, duties, powers and liabilities of partners among themselves and in relation of third parties. Partnership dissolution. Prerequisite: Bus. 5.
Fall each year

Bus. 26. *Business Law—Corporations* *2 credits*
Statutory and case law principles of corporations. Organization of corporations. Corporate powers, by-laws and duties. Rights, duties, powers and liabilities of directors, officers and shareholders. The legal aspect of corporation finance. Statutory and case law principles of real property. Prerequisite: Bus. 25.
Spring each year

Bus. 101. *Advanced Accounting* *4 credits*
Special sales procedures. Installment sales, consignments, agency and branch accounting. Consolidations. A comprehensive study of consolidated balance sheets and profit and loss statements. Fiduciary and budgetary accounting. Statement of affairs. Receivership accounts and statements. Accounting for estates and trusts. 4 hours lecture and 5 hours laboratory. Prerequisite: Bus. 22.
Fall each year

Bus. 102. *Cost Accounting* *4 credits*
Basic principles of cost accounting and their practical application in the development of cost accounting procedures. The principles of process costs, specific order costs, and standard cost systems. Practical application of process cost and specific order cost systems. Principles of estimated cost systems and the development of budgets as a basis for cost control. Specialized cost treatments. Reports for executive direction. 3 hours lecture and 2 hours credit laboratory. Prerequisite: Bus. 22.
Spring each year

Bus. 103. *Money and Banking* *3 credits*
A general survey of the field of money, credit and prices and an introduction to the study of commercial banking. Evolution of money media, functions of money, monetary standards and the present monetary system of the United States. Commercial banking operations and the use of bank credit in financing business. History of banking in the United States. The operations of a commercial bank. Banking transactions. Recent legislation affecting money, credit and banking in the United States. Prerequisite: Econ. 24.
Fall each year

Bus. 104. *Money and Banking* *3 credits*

A detailed study of commercial bank operations. Bank reserves, deposits and bank notes. Loans and Discounts. Bank Investments. The credit department. Interbank relations including chain, group and branch banking. The Clearing House and the Par Collection System. The Federal Reserve System. The money markets. Foreign exchange and the methods of financing foreign trade. The Banking System of the United States. Banking problems of today. Prerequisite: Bus. 103.
Spring each year

Bus. 105. *Business Statistics* *3 credits*

Statistical methods, their importance and use in the modern business enterprise. Cautions in their use and interpretation. Initiating and conducting a statistical investigation. Use of mechanical equipment in the determination and preparation of statistical findings. Sampling and the concept of error. Tabular and graphic representation of statistical data. The frequency distribution. Averages. Dispersion and Skewness. Dispersion of statistics computed from samples. 2 hours lecture and 2 hours laboratory.
Fall each year

Bus. 106. *Business Statistics* *3 credits*

Introduction to the theory of probability; application to statistical problems. Index number construction. Current indices used to measure business activity, prices, wages, cost of living, etc. Time series analysis. Related time series. Correlation and forecasting. The application of statistical methods to the analysis of business data and industrial problems. Frequent use of mechanical equipment in an endeavor to facilitate the computation of data needed for time series analysis and index number construction. 2 hours lecture and 2 hours laboratory.
Spring each year

Bus. 107. *Marketing* *4 credits*

The distribution of a product from its very inception to its use by the ultimate consumer. Co-operative marketing, the marketing problems of the individual business, market research and analysis and the choice of marketing channels. All problems are reviewed in the light of the marketing systems of the United States with direct emphasis upon selling through chains, wholesalers, jobbers and direct distribution to retailers and consumers.
Spring each year

Bus. 108. *Industrial Organization and Management* *4 credits*

The principles and problems of the business enterprise from the executive point of view. The economic background of management. Theory of specialization, simplification, standardization, diversification, expansion, contraction and integration. The organization of the industrial plant and principles of management. To acquaint the students with various processes and methods of manu-

facture, frequent use is made of visual aids and factory trips where possible. No prerequisite.
Fall each year

Bus. 120-121. *Auditing Theory and Applications* *4 credits*
The verification of accounts and their presentation in financial statements. A review of "generally accepted accounting principles" and an introduction to applicable auditing standards. Types of audits, audit programs, the preparation of reports, and the ethics of the profession. Review of internal controls. The preparation and indexing of working papers. Types of reports currently employed. Summarization by a complete audit of a specific case. 3 hours lecture and 2 hours credit laboratory. Prerequisite: Bus. 22.
Fall each year

Bus. 122. *Federal Taxation and Procedure* *3 credits*
The federal system of taxation insofar as it concerns the individual taxpayer. The nature of taxable income. A study of the Internal Revenue Code, regulations and selected materials relating to individual tax accounting. The preparation of Internal Revenue Form 1040. Pay-as-you-go Federal Tax System and required returns. Gross income, items included and excluded. Allowable deductions and credits. Filing of returns. Specialized tax accounting requirements for the individual businessman. 4 hours lecture. Prerequisite: Bus. 101-2.
Spring each year

Bus. 123. *Federal Taxation and Procedure* *3 credits*
A study of the Internal Revenue Code, regulations and selected materials relating to partnerships, estates and trusts, and corporations. The taxing powers and tax systems of states and their municipal subdivisions; state income, municipal income, capital stock, franchise, loans, bonus, escheat, personal property and real property taxes. Miscellaneous federal taxes and the Social Security System. 4 hours lecture. Prerequisite: Bus. 122.
Spring each year

Bus. 126-127. *Corporate Financial Management* *4 credits*
The financial structure and problems of the modern business corporation. Common types of securities. Promotion, including the parts played by promoters, investment bankers and security dealers. The security markets. Circulating capital and its relationship to financial management. Determination, management and distribution of income. Financial problems of expansion including changes in the financial plan. Securing funds for expansion. Failure of corporations, reorganizations, readjustments, and receiverships. Bankruptcy and liquidation. Prerequisite: Econ. 24.
Fall each year

Bus. 165. *Statistical Quality Control* *3 credits*
An introduction to statistical methods of quality control. The theory of probability. The use of quality control charts for variables and attributes. A

study of distribution and the theory of sampling, with applications to problems in regression analysis and statistical quality control. Problems of definitions; planning, organizing and installing quality controls in typical manufacturing plants. Prerequisite: Bus. 106. Stat. Lab.
Spring 1961

Bus. 170. *Marketing Management and Policies* *3 credits*
The aim of this course is to integrate the several approaches to policy making and administration in the field of Marketing. The stress will be on the functions of marketing management in determining and controlling policies. Areas of advertising, retailing, sales and sales management will be integrated in the over-all marketing problem. Prerequisite: Bus. 107.
Fall each year

Bus. 171. *Financial Management* *3 credits*
The purpose of this course is to give the student an integrated knowledge of the policies and practices of the various financial institutions in our economy. It concerns such types as investment banking, mortgage and real estate banking, foreign exchange institutions, the securities and the money markets, insurance companies, mercantile credit institutions, and savings and loan associations. The importance of these institutions in the field of business management is emphasized. Prerequisite: Bus. 104.
Spring each year

Bus. 172. *Administrative Practices* *3 credits*
This course is devoted to a discussion of the principles and techniques of administration. Practical operating problems are presented in the fields of personnel, office, factory, credit, sales and traffic management, with stress on current literature in these fields. Practices and policies of administration of these various segments of a modern business are discussed and integrated into the field of Business Management. Prerequisite: Bus. 108.
Spring each year

Bus. 173. *Applied Statistical Analysis* *3 credits*
The application of the measures of central tendency and the measures of dispersion to business problems. Introduction to Normal Distribution, Binomial Distribution, Poisson Distribution, and Chi Square Distribution. Sampling, and estimates based on sampling. Problems of Estimation; Tests of Hypotheses. Analysis of Variance. Application of these techniques will be made to actual business problems. Prerequisite: Bus. 106. Stat. Lab.
Fall each year

Bus. 174. *Analysis of Time Series and Correlation* *3 credits*
The methods of fitting trends, straight-line and curves, as well as first, second, and third degree curves to time series. The analysis of changes in patterns. Cyclical movements and the reliability of seasonal indices. Correlation analysis

and the methods of determining correlation, including simple, partial, and multiple methods. Measures. Prerequisite: Bus. 106. Stat. Lab.
Spring each year

Bus. 175. *Business Cycles and Forecasting* *3 credits*
A critical inquiry into the nature, causes and control of the business cycle, with special reference to the analysis of business fluctuations, interpretation of current business conditions, and forecasting. Prerequisite: Bus. 106. Stat. Lab.
Spring 1960

DEPARTMENT OF CHEMISTRY

Mr. Burti, *Chairman;* Mr. Appleton, Fr. Casey, S.J., Mr. Murray, Dr. Waters

The aims of the department are: 1. To train students to think accurately and logically, to develop an analytical type of mind, and to inculcate the scientific method of attacking problems not only in chemistry but in other fields of endeavor. 2. To develop character traits such as patience, pertinacity, honesty and neatness, which are indispensable to the non-scientist as well as the scientist. 3. To train the student for a position carrying some degree of responsibility, either as an advanced student in a graduate or professional school or as a member of the staff of an educational, industrial or research institution.

To major in Chemistry the following courses are required: Mathematics 13-14; 21-22; Physics 11-12; Chemistry 1-2; 22-23 plus twenty-four additional credits in upper division courses including Chemistry 101-102 and Chemistry 123-124.

Chem. 1 & 2. *Inorganic Chemistry and Qualitative Analysis* *8 credits*
A study of the laws, theories and principles of General Chemistry with a survey of the principal elements and their important compounds. A study of the principles of ionization, oxidation-reduction, solubility product and complex-formation methods. Laboratory work exemplifies classroom discussion, and includes semi-micro techniques in the detection and separation of cations and anions.
Fall and Spring each year

Chem. 22. *Quantitative Analysis* *4 credits*
A survey of the general principles of gravimetric, volumetric and electrolytic analyses. Laboratory work stresses technique. 2 hours lecture and 6 hours lab. Prerequisites: Chem. 1, 2.
Fall each year

Chem. 23. *Advanced Quantitative Analysis* *3 credits*
A survey of advanced methods of analysis using specialized apparatus. The analysis of alloys, ores and mixed salts is emphasized. 1 hour lecture and 6 hours lab. Prerequisite: Chem. 22.
Spring each year

Chem. 101 & 102. *Organic Chemistry* *8 credits*

An introduction to the chemistry of the principal aliphatic and aromatic compounds of carbon and their derivatives. Laboratory work includes investigation of the chemical properties of the compounds studied, and several of the more important organic preparations. Prerequisites: Chem 1 and 2. 2 hours lecture and 6 hours laboratory each semester.
Fall and Spring each year

Chem. 103. *Advanced Organic Chemistry* *4 credits*

A continuation of Chem. 101-102, including a study of the alicyclics and heterocyclics, the organic dyes and the naturally occurring compounds of carbon. Laboratory work will consist of a number of the more difficult syntheses and will require some investigation of the original literature. 2 hours lecture, 6 hours laboratory. Prerequisites: Chem. 101 and 102.
Fall each year

Chem. 106. *Advanced Inorganic Chemistry* *2 credits*

A detailed study of the chemical properties of elements with regard to the electronic structures and sizes. The Periodic System is the basis for such study. Two hours lecture. Prerequisites: Chem. 1 and 2 and Chem. 123 and 124.
Not offered 1959-1960

Chem. 121. *Biochemistry* *3 credits*

A study of the chemical nature and more important reactions of the biologically active compounds such as carbohydrates, lipids, amino acids, proteins, minerals, vitamins and hormones. 2 hours lecture and 3 hours lab. Prerequisites: Chem. 22, 101, 102.
Fall 1959

Chem. 122. *Physiological Chemistry* *3 credits*

A study of the metabolism, digestion and absorption of carbohydrates, lipids, amino acids and proteins together with the role of enzyme and enzyme systems in the above processes. A survey of the physiological action of hormones and a discussion of recent advances in the field of Physiological Chemistry are included in the course. 2 hours lecture and 3 hours lab. Prerequisites: Chem. 22, 101, 102.
Spring 1960

Chem. 123 & 124. *Physical Chemistry* *8 credits*

A study of the physico-chemical properties of matter and the dynamics of chemical reactions. Laboratory experiments illustrate the principles studied. 3 hours lecture and 3 hours lab each semester. Prerequisites: Chem. 22; Math. 21, 22.
Fall and Spring each year

Chem. 126. *Organic Analysis* *3 credits*
A study of systematic classification and identification of organic compounds from their solubilities and group reactions, including the separation and identification of the components of organic mixtures. 1 hour lecture and 6 hours lab. Prerequisites: Chem. 101 and 102.
Spring each year

Chem. 127. *Chemical Literature* *1 credit*
A study of the published source material of chemical science and chemical industry. The course includes practical instruction in library technique. One hour lecture.
Fall each year

Chem. 129 & 130. *Thermodynamics for Chemists* *4 credits*
A study of the laws of thermodynamics. A detailed consideration of the application of the laws and relationships evolved from the laws and states of matter, phase changes, solutions of non-electrolytes and electrolytes, and chemical reactions. Two lectures each semester. Prerequisites: Chem. 123 and 124.
Fall and Spring each year

Chem. 132. *Undergraduate Research* *2 credits*
Individual study and research in connection with a specific chemical problem. The course taken with the permission of the Chemistry Department Staff. Prerequisites: Chem. 103, 124 and 127.
Spring each year

DEPARTMENT OF CLASSICAL LANGUAGES

Mr. Mann, *Chairman*, Mr. Brannan, S.J., Mr. Long

Courses in the Department of Classical Languages are designed to accomplish the following objectives: (1) to give the student a solid foundation in the elements of Greek and Latin; (2) to engender an appreciation of the liberal aspects of Classical studies; (3) to permit the taking of a major in Classics with concentration in Greek or Latin or both; (4) to enable the student to follow the Classical Arts curriculum with a major in Economics, English, History and Government, Modern Language, Philosophy, Psychology or Sociology.

Classics majors must present a minimum of twenty semester hours in upper division courses including Latin 101-102. Students not concentrating in Greek satisfy Departmental requirements by taking Greek 21-22. French or German are recommended for the modern language requirement.

Students majoring in other fields satisfy the Latin requirement of the Bachelor of Arts Course by following one of the sequences: Latin 3-4; 21-22 or Latin 21-22; 101-102. No credit is attached to Latin 1-2; students commencing their study of Latin at the University, however, may complete the Latin requirement by taking Latin 3-4; 21-22 in Sophomore and Junior year.

I. Greek

Greek 1 & 2. *Elementary Greek* — *8 credits*
An intensive course in the fundamentals of Classical Greek grammar.
Fall and Spring each year

Greek 21. *Plato* — *3 credits*
Reading of the Apology. A philosophical, historical and literary analysis of Plato and his master, Socrates. Supplementary reading in the *Crito* and *Phaedo*.
Fall 1959

Greek 22. *Euripides* — *3 credits*
Reading and analysis of the *Medea* with an evaluation of the art and thought of Euripides.
Spring 1960

Greek 31. *Sophocles* — *3 credits*
Evaluation of Sophocles as a poet, dramatist and thinker through a study of the *Oedipus Tyrannus*.
Fall 1960

Greek 32. *Demosthenes* — *3 credits*
An analysis of the *De Corona* as a model of rhetoric. Consideration of the rhetorical norms established by Aristotle.
Spring 1961

Greek 101. *Homer* — *3 credits*
Selected readings from the Iliad and the Odyssey. An appreciation of the diction, thought and beauty of Homer.
Fall 1959

Greek 102. *Thucydides* — *3 credits*
Evaluation of Fifth Century Athens and of Thucydides as philosopher and historian through a reading of the History of the Peloponnesian War.
Spring 1960

Greek 103. *Greek Philosophy* — *3 credits*
Greek philosophical thought from Thales to the Neoplatonism of Plotinus.
Fall 1960

Greek 104. *Christian Greek Literature* — *3 credits*
Selections from St. Ignatius of Antioch, St. Polycarp and St. Basil. Lectures on the development of Christian Greek literature.
Spring 1961

Greek 109 (110). *Readings in Greek Literature* *3-6 credits*
Selections from Greek writers to suit the student's special interest. Paper required. Course given by special arrangement.

II. Latin

Latin 1 & 2. *Elementary Latin*
An intensive course in the fundamentals of Classical Latin grammar. Four lectures per week. No college credit is offered for this course.

Latin 3 & 4. *Intermediate Latin* *8 credits*
Review of fundamentals. Composition. Reading of selections from Cicero and Virgil.
Fall and Spring each year

Latin 21. *Livy and Virgil* *4 credits*
Selections from Livy I and XXI, and from Books VII-XII of Virgil's Aeneid, Exercises in composition.
Fall 1959

Latin 22. *Horace and Catullus* *4 credits*
Lyric poetry illustrated by the Odes of Horace and selected poems of Catullus. Exercises in composition.
Spring 1960

Latin 101. *Horace and Juvenal* *4 credits*
A study of Roman satire revealing the life, manners and thought of the times. Exercises in composition.
Fall 1959

Latin 102. *Cicero: Rhetoric* *4 credits*
The *Pro Lege Manilia* and *Pro Milone* are studied from the standpoint of rhetorical analysis, special attention being given to structure and development. Exercises in composition.
Spring 1960

Latin 103. *Cicero and Lucretius* *3 credits*
Selections from the Tusculan Disputations and the *De Rerum Natura* illustrate contrasting developments in Roman thinking. The course includes a brief survey of ancient philosophy.
Fall 1960

Latin 104. *Christian Latin Literature* *3 credits*
Selections from Christian Latin writers with concentration on the Confessions of St. Augustine. Lectures on the development of Christian Latin literature.
Spring 1961

Latin 105. *Plautus and Terence* *3 credits*

Reading of the *Duo Captivi* and *Phormio*. Lectures on the development of Roman comedy.
Fall 1959

Latin 106. *Tacitus* *3 credits*

The *Agricola* and *Germania* are read. A study of style and content in Tacitus. Reference to the Annals and Histories.
Spring 1960

Latin 109 (110). *Readings in Latin Literature* *3-6 credits*

Selections from Latin writers to suit the student's special interest. Paper required. Course given by special arrangement.

DEPARTMENT OF EDUCATION AND PSYCHOLOGY

Dr. Lennon, *Chairman;* Dr. Bourne, Mr. Budash, Mr. Cannon, Mrs. Davies, Mr. Doherty, Miss Evans, Dr. Fitzgerald, Mr. Gallagher, Fr. Henderson, S.J., Dr. Kenny, Mr. Langan, Dr. Lilly, Mr. Whalen

The aims of the Department of Education and Psychology are: (1) to develop in the individual those professional qualities required for successful teaching; (2) to offer professional training for certification as an elementary or secondary school teacher; (3) to meet requests for specific courses by teachers in service; (4) to present a co-ordinated undergraduate program in psychology for the student interested in graduate work in psychology or related fields; (5) to aid in the professional development of teachers by presenting a well integrated program of graduate studies leading to the Masters degree.

Students working for elementary or secondary school certification must arrange their programs in consultation with members of the department. Practice teaching will be arranged for students who meet course requirements and have other necessary qualifications:

(1) A general academic record of at least C.
(2) Approval of applicants by respective department heads.
(3) Evidence of sound personality.
(4) Competence in both written and oral English. Tests may be administered.

Educ. 21. *Introduction to Education* *3 credits*

An orientation course for all students who plan to enter the teaching profession. Emphasis is placed upon the evolution of the public school system, democratic principles, objectives, curriculum, the learner, the function of the teacher and professional requirements.
Fall each year

Educ. 22. *Educational Psychology* *3 credits*

An introductory course in educational psychology stressing growth and development, individual differences, intelligence, motivation, learning principles, transfer of training and educational measurement.
Spring each year

Educ. 101. *Tests and Measurements* *3 credits*

A practical course giving the history of the testing movement, general principles and criteria of measurement and evaluation. Practice is afforded in the construction of different forms of test questions. A limited presentation of fundamental statistics is taught for the correct handling of test data.
Fall each year

Educ. 102. *History of Education* *3 credits*

A survey of educational development from primitive times to the present. The aim of the course is to trace the development of present tendencies from primitive society, Greek and Roman education, the Renaissance and the changes induced by realism, philanthropic education, the psychological and scientific movements. Contributions to modern educational practice are noted.

Educ. 103. *Principles and Techniques of High School Teaching* *3 credits*

A secondary school methods course emphasizing principles and methods of teaching such as socialized recitation, project and problem methods, visual instruction, differentiated instruction and assignment. This course to be taken concomitantly with Education 104. Prerequisites: Education 21 and 22.
Fall 1959

Educ. 104. *Special Methods of Teaching in High School* *3 credits*

The selection and organization of content of high school courses and the classes are taught in laboratory practice. Special methods of instruction for the various subject matter fields. This course must be taken concomitantly with Education 103. Prerequisites: Educ. 21 and 22.

A. Methods of Teaching of Social Studies.

B. Methods of Teaching English.

C. Methods of Teaching Modern Languages.

D. Methods of Teaching Science.

E. Methods of Teaching Mathematics.

Fall each year

Educ. 105. *Observation and Practice Teaching* *6 credits*

Observation and study of classroom teaching are combined with actual student teaching under expert supervision. Group conferences and personal interviews

are held frequently with the supervisor of practice teaching. The student teacher is expected to take part in all school activities. Prerequisites: Education 21, 22, 103 and 104.
Spring each year

ELEMENTARY EDUCATION

Educ. 120. *Principles of Elementary Education* *3 credits*
Basic principles of elementary education and the philosophical bases which underlie them are studied from an historical viewpoint. Professional and community factors that have affected the elementary school and the trends in development of the modern school are treated in some detail. Organization of curriculum units, testing, methodology and pupil guidance are considered to some degree.
Fall each year

Educ. 121. *Child Psychology* *3 credits*
The growth and development of the child including the physical, social, emotional, intellectual, moral and religious, and language changes from age to age are treated in detail. Especial attention is paid to their importance for the elementary teacher.
Spring each year

Educ. 122. *Elementary School Curriculum* *3 credits*
This course treats of the development of the elementary school curriculum, its relation to society and the individual child. Extensive treatment is afforded to content and methods in art, music, science, language, etc., with reference to the State Bulletin.
Fall each year

Educ. 123. *Teaching of Art* *3 credits*
This course will give the student an understanding of the children's changing needs of artistic expression. It has to do with methods and techniques for different age levels and classroom situations. Sources of art materials and their selection are treated. Work units integrating art with subject matter are included in this course.
Fall, alternate years

Educ. 124. *Teaching of Reading* *3 credits*
A study of modern reading materials and techniques in the elementary grades. Word-recognition skills, development of vocabulary, wide understanding, recreational reading as well as reading disabilities and their correction are considered in this course.
Spring each year

Educ. 125. *Teaching of Arithmetic* *3 credits*

Principles, materials and methods of instruction in elementary arithmetic; attention is given to techniques for developing units of work and techniques for presentation of quantitative data at the elementary level.
Fall each year

Educ. 126. *Teaching of Music* *3 credits*

A study of appropriate materials and methods for the development of appreciation in each grade by listening and performance.
Fall, alternate years

Educ. 127. *Teaching of Health and Physical Education* *3 credits*

A survey of the principles of teaching health and physical education in the grades. First aid, healthful habits and attitudes, safety precautions involving the child are considered. Attention is also paid to games and physical education activities in the different grades.
Fall each year

Educ. 128. *Practice Teaching and Observation in the Elementary Schools* *8 credits*

Observation and classroom teaching under the guidance of expert co-operating teachers. Student teachers hold frequent personal interviews and group conferences with the supervisor of practice teaching.
Spring each year

Educ. 129. *Teaching Language Arts in the Elementary School* *3 credits*

Developing language arts in elementary school pupils emphasizes important activities and basic practices in school and in life outside the school in the areas of speaking, listening, reading, written expression, spelling and handwriting.
Spring each year

Psychology

The student who is majoring in psychology will complete 24 upper division credits including the following required concentration of courses: Psych. 121; 122; 125; 126; 129; Education 22 and 101. He may also elect courses in addition to the required concentration, but not in lieu of it from the psychology electives: 120; 123; 127; 128 and Education 121, or from such cognate electives as Biology 21, 22 and 120; Sociology 104; Physics 1 and 2; Mathematics 13, 14, 21 and 22.

Psych. 120. *History of Psychology* *3 credits*

A survey of some of the more important theoretical systems, experiments and personalities in the development of modern psychology as a science. Prerequisites: Psych. 121, 124.

Psych. 121. *General Experimental Psychology* *3 credits*

An introductory course designed to acquaint the student with basic concepts of experimental psychology, emphasizing facts, principles and methods.
Fall each year

Psych. 122. *Experimental Psychology; Laboratory* *3 credits*

Lectures cover topics of sensation, perception, memory, reasoning. The student will perform experiments dealing with these topics in the laboratory. Lecture 2 hours; laboratory 2 hours. Prerequisite: Psych. 121.
Spring each year

Psych. 123. *Mental Hygiene* *3 credits*

Application of psychological principles to the problem of maintaining adjustment and developing a well-integrated personality. Consideration is paid to factors influencing behaviour, dynamics and motivation of behaviour; varieties of adjustment.
Fall each year

Psych. 125. *Abnormal Psychology* *3 credits*

A study of predisposing and precipitating factors in the development of neuroses and psychoses; an attempt is made to synthesize existing classifications of mental disorders and to examine biological, social and cultural influences before discussing methods of therapy.
Spring each year

Psych. 126. *Social Psychology* *3 credits*

A study of social aspects of personality; the development and manifestations of social awareness; suggestion, imitation, group behavior and the individual mechanisms of social adjustment.
Fall each year

Psych. 127. *Industrial Psychology* *3 credits*

General Survey of applied psychology. The principles and techniques in selection and management; job analysis; occupational descriptions; employment procedures; interviews, tests, inventories, counseling; industrial training, promotions, transfers, prevention of accidents; management employee relations.
Course offered by special arrangement

Psych. 128. *Introduction to Clinical Psychology* *3 credits*

A survey of the principal diagnostic and treatment procedures and resources used in various clinical settings; consideration of the professional duties, skills and ethics of the clinical psychologist. Prerequisites: Psych. 121, 125, 126.
Spring 1959

Psych. 129. *Elementary Statistics* *3 credits*

Frequency distributions; measures of central tendency and variability; normal probability curve; elementary sampling; correlation are topics treated in this course.
Spring each year

DEPARTMENT OF ENGINEERING

Mr. Plonsky, *Chairman;* Mr. Chickson, Mr. Beezup

The objective of the Engineering Department is to introduce the student into the highly technical training necessary for all phases of the Engineering Profession.

Engn. 9. *General Drafting* *4 credits*

Freehand and mechanical lettering, use of drafting instruments, applied geometry, orthographic projection, auxiliary views, sectional views, isometric views, oblique views, dimensioning, elements of structural drawing, piping and welding drawing, elements of architectural drawing with details of walls and kitchen assembly, heating and plumbing layouts, map and topographic drawing with profiles, pencil and ink tracings. 9 hours drafting room practice and 1 hour lecture.
Fall (evening)

Engn. 13. *Mehanical Drawing* *3 credits*

The use of drawing instruments is applied to the drawing of orthographic views of objects, isometric and oblique drawings, sectional views, conventional and semi-conventional representation of screw threads, auxiliary views, tracings on tracing paper and tracing cloth. Freehand sketching of objects in orthographic projection and isometric view is also presented. Use of proper conventional mechanical lines as well as the art of good lettering is stressed in all plates. 6 hours drafting room practice and 1 hour lecture.
Fall each year

Engn. 21. *Engineering Mechanics—Statics* *4 credits*

This course is devoted to the study and analysis of various types of force systems; resultants and conditions of equilibrium; stress analysis of the parts of different types of structures by graphical and analytical methods; frictional forces; centroids and moments of inertia of areas and solids. Prerequisite: Physics 18; Corequisite: Math. 21.
Fall each year

Engn. 22. *Engineering Mechanics—Dynamics* *4 credits*

Kinematics of particles and rigid bodies which includes linear, curvilinear, angular and relative motions; inertia forces, impulse momentum, work, energy and power considerations of mechanics; mechanical vibrations. This course is designed for both engineering and physics students. Prerequisite: Engin. 21; Corequisite: Math. 22.

Spring each year

Engn. 23. *Plane Surveying* *3 credits*

The student will be given the opportunity to familiarize himself with the Dumpy and Wye levels, several makes of transits, their use, care and adjustment. The field work will include of the following: Running of closed and open traverses, determination of the azimuth of a course by solar observation, stadia shots for "topo" and location data, bench mark and profile leveling, staking out of simple curves. In addition to the theory implied with the foregoing, the following points will be considered: calculation of areas by co-ordinates, DMD, and planimeter; calculation of a vertical curve; plotting of a map from a deed; earthwork calculations. 1½ hours Lec. and Rec 4½ hours field work. Prerequisite: Math. 13.

Fall each year

Engn. 24. *Descriptive Geometry* *3 credits*

The geometric method of projection of points, lines and planes and the application of these methods to graphical solution of engineering problems involving lines, planes and solids; truncations and intersections of solids leading to the development of surfaces and traces of perspective views. The rules of drafting room practices are continued regarding lettering and conventional lines. One hour lecture, six hours drafting room practice. Prerequisite: Engin. 13.

Spring each year

Engn. 25. *Engineering Materials* *3 credits*

This course is designed to acquaint the student with the materials that are used in engineering construction and fabrication; their source, manufacture, properties, methods of testing, uses and limitations. The subject includes not only metals but also cementing materials, wood, rubber, glass, plastics, corrosion and protective coverings. Prerequisite: Chem. 2.

Fall each year

Engn. 26. *Surveying* *4 credits*

Four hours of lecture recitation and computation per week will include basic surveying, review of the required mathematics, triangulation, volume measurements, reduction of field notes to diagrams, general earth moving computation, simple curves, vertical curves, compound curves, use of courthouse deed descriptions for location data. Six hours of field work will include familiarization, use, care and adjustment of the Dumpy and Wye levels, several makes of transits and their accessories. Simple stake-out, the differential and reciprocal

methods of leveling, the stadia method of measuring distances, the stakingout of highway curves as well as the location of bridges, buildings, underground and overhead utilities lines, building site survey and stake from deed description. In addition the tangent method of plotting a traverse including contour lines and other pertinent information necessary for the completion of a map will be considered. Laboratory on Saturday, 9 A. M. to 3 P. M.
Spring (Evening only)

Engn. 43. *Strength of Materials* *3 credits*

Stresses and strains in compression, tension and shear. Torsion in shafts. Joints. Shear and bending moment equations and diagrams. Stresses and deflection in beams. Beams of two materials. Resilience. Columns. Prerequisites: Engn. 21, Math. 22.
Spring 1960 (evening)

Engn. 101. *Elements of Electrical Engineering* *4credits*

The application of the principles of electric and magnetic circuits to the theory and performance of electrical machinery such as direct-current generators and motors, alternating-current single-phase and three-phase generators and motors, control circuits, transformers, electrical measuring instruments. Classroom instruction is supplemented by experimental work in the electrical machinery laboratory wherein the student is familiarized with the techniques of operating and of obtaining characteristics of electrical machinery. This course is designed for Electronic Majors. Prerequisite: Physics 12 or 20.
Spring each year

DEPARTMENT OF ENGLISH

Fr. Grady, S.J., *Chairman*; Dr. Clarke, Mr. Cullather, Mr. Driscoll, Mr. Higgins, Mrs. Lesniak, Dr. Lodge, Mr. McGurl, Dr. Murray, Mr. O'Gorman, Mr. O'Rourke, Fr. Quinn, S.J.

The aim of the Department of English is to furnish the student with a balanced course in English which will realize the objectives of a liberal arts college. The course is planned to train the student to read, write and speak English as effectively as possible and encourage him to appreciate more deeply the artistic creations of the English language. All candidates for the degree will be required to take courses 1-2, 3-4, and 23-24. The remaining courses are offered as electives for those who have satisfied the requirements of the basic courses.

To major in English the following courses are required: English 1-2; 3-4; 23-24; plus twenty-four upper division credits, which must include the following as partial fulfillment of the prescribed twenty-four: English 111, 112, 113; 103, 105, 106.

Fundamental Skills in English

The object of this course is a thorough mastery of the fundamentals of English. Spelling, punctuation, grammar, diction, sentence and paragraph structure. Required of all students who fail to meet the required score in the English entrance examination.

Three periods weekly—No credit—Fee $60.00.

Developmental Reading

Required of students who show deficiency in reading.

One hour weekly—No credit—Fee $20.00.

Engl. 1 & 2. *College Composition and Introduction to Literature* — *6 credits*

This course is designed to increase the college student's mastery of the techniques of communication in English. The principles of literary structure: unity, coherence, emphasis. The qualities of style: clarity, force, interest. Development and arrangement of ideas in the informal essay. Narration and description. The nature, elements and types of Poetry: principles of versification. Appreciation of lyric poetry.

(N.B.: A program of required reading is integrated with and supplements lectures and discussions, with required exercises.)

Fall and Spring each year

Engl. 3 & 4. *Public Speaking* — *2 credits*

The principles of oral expression; enunciation, pronunciation, emphasis, interpretation; together with the elements of argumentation, the preparation and presentation of formal and informal speeches.

Fall and Spring each year

Engl. 23 & 24. *Oratory and Dramatic Literature* — *6 credits*

A study of the more formal types of literary composition, this course emphasizes the structure and development of the prepared oration—the invention, disposition and expression of arguments, and oratorical style—during the first semester. The second semester is devoted principally to a study of the structure of the drama. Lectures, discussions and required exercises, together with required program of supplementary reading.

Fall and Spring each year

Engl. 101. *British Literature of the XVIIth Century* — *3 credits*

A critical and appreciative study of the literary work of the writers of the Jacobean and Restoration period, including Donne, Crashaw, Herrick, Sir Thomas Browne, Jeremy Taylor, Bunyan and Milton.

Fall 1960

Engl. 102. *British Literature of the XVIIIth Century* *3 credits*
A critical and appreciative study of the writers of the Neo-classical period, including Samuel Johnson, Goldsmith, Burke, Walpole, Boswell, Pope, Swift, Sheridan, Addison and Steele, Gray, Thomson, Cowper and Blake.
Spring 1961

Engl. 103. *British Literature of the XIXth Century, (a) The Romantic Period* *3 credits*
A critical and appreciative study of the writers of the "Age of Romanticism" in British Letters: Wordsworth, Coleridge, Shelley, Keats, Byron, Scott, DeQuincey, Charles and Mary Lamb, Landor, Leigh Hunt.
Fall 1959

Engl. 104. *British Literature of the XIXth Century, (b) The Victorian Era* *3 credits*
A critical and appreciative study of the writers of the Victorian period, including Tennyson, the Brownings, the Brontes, Carlyle, Newman, Macaulay, Thackeray, Dickens, Matthew Arnold, Ruskin, Swinburne.
Spring 1960

Engl. 105. *American Literature to 1900* *3 credits*
A survey of the development of the body of distinctively American Letters through the XVIIIth and XIXth centuries, with special emphasis on Hawthorne, Irving, Cooper, Melville, Whitman and the Concord Poets.
Fall 1960

Engl. 106. *American Literature after 1900* *3 credits*
A survey of the maturer and more nationally conscious American Literature which emerged after the World War I, particularly in the works of Wolfe, Hemingway, Cather, O'Neil, Frost, Robinson, Faulkner, Sinclair Lewis, et al.
Spring 1961

Engl. 107. *The Novel in English: (a) Chaucer to Scott* *3 credits*
A study of the development of the novel form in the English language, British and American, from Chaucer to Scott.
Fall 1959

Engl. 108. *The Novel in English: (b) Dickens to the Present* *3 credits*
A study of the major novelists, British and American, from Dickens to the present, with attention to the evolution of the novel as a social commentary.
Spring 1960

Engl. 109. *The Forms of Drama*: (*a*) *Aeschylus to Ben Johnson* *3 credits*

A study of the development of dramatic forms from the Greek classic through the miracle and morality play to the fluid plays of the Elizabethan era.
Fall 1959

Engl. 110. *The Forms of Drama*: (*b*) *Sheridan to Shaw* *3 credits*

A study of the dramatic forms that developed after the Elizabethan period, emphasizing the development of the "problem play" after Ibsen, and the growing attempts to "break through the proscenium" and widen stage horizons.
Spring 1960

Engl. 111. *Shakespeare*: *Tragedies* *3 credits*

A critical and apppreciative study of five major tragedies and of five of the principal chronicle plays.
Fall each year

Engl. 112. *Shakespeare*: *Comedies* *3 credits*

Critical and appreciative study of the major comedies and of the comic sequences in the chronicle plays.
Spring each year

Engl. 113. *Medieval English Literature, 1000-1400* *3 credits*

A study of the historical, social and literary background with emphasis on the works of Chaucer. (For selected advanced students majoring in English).
Fall 1959

Engl. 114. *Principles of Literary Criticism* *3 credits*

A study of the theory of literary criticism and the principles of literary aesthetics, from Aristotle and Longinus to the present.
Spring 1960

Engl. 115. *Journalism* *3 credits*

A survey of the history and development of modern journalism; journalistic terminology; newspaper writing; publicity, advertising copy, news-reporting, feature and editorial writing. Newspaper and magazine editorial organization. Headline writing.
Fall 1959—Evening Sessions

Engl. 116. *Journalism* *3 credits*

The preparation of news-copy; editing copy for publication; preparation of feature and special articles; editorials and editorial policies; newspaper and magazine layout. Prerequisite: English 115
Spring 1960—Evening Sessions

Engl. 117. *Creative Writing Seminar* *3 credits*

Group conferences and discussions of the techniques of writing for publication: fiction, poetry, playwriting, biography. Critical discussion of work of seminar members. For selected advanced students only, who have shown superior ability in creative expression.

Fall 1959

Engl. 120. *Critical Approaches to the Communication Arts* *3 credits*

A discussion of the philosophical basis for critical appreciation of modern literature and the media in which it is presented: publishing, motion pictures, radio and television; and an evalution of the criticism of these media as presented in professional literary magazines and reviews. Use is made of recordings of plays, music; and of attendance at selected theatrical presentations and concerts.

Spring 1961

Engl. 121. *Contemporary Poetry* *3 credits*

A survey and study of major contemporary poets, including T. S. Eliot, Auden, Spender, Macleish, Aiken.

Fall 1960

Engl. 122. *English Seminar* *Variable credit*

For students majoring in English Literature. Discussion of assigned topics and of areas of reading

Spring 1960

Engl. 131-132. *Masterworks of Western Civilization* *6 credits*

A study of masterpieces of literature, from the Hebrew Old Testament and classic Greek to the modern European, designed to illustrate the development of western civilization and the effect of the various periods in the course of history on social and political structures, economies, art forms, as well as literature. Authors studied include Aeschylus, Aristotle and Plato, Plutarch, Cicero, Horace, St. Augustine, Dante, Chaucer, Milton, Cervantes, Racine, Corneille, Moliere, Voltaire, Goethe, Dostoievsky, Tolstoi. Lectures, discussions, required readings; with films, film strips, recordings. (Required for A.B. students not in the classical language curriculum. Elective for other Junior and Senior students). *Three credits each of two semesters.*

Fall and Spring 1960-1961

DEPARTMENT OF HISTORY AND POLITICS

Mr. Brown, *Chairman*; Fr. Gallagher, S.J., Mr. Kenkel,
Dr. McGuigan, Mr. Scully

The Department Aims: (1) To contribute to the culture and development of the students; (2) to encourage the student to approach the subject along the lines of solid historical methodology in his investigation, determination and reconstruction of data; (3) to present history as the study of human activities and concrete events which have institutional significance; (4) to demonstrate that the content constitutes a body of knowledge the parts of which are interdependent because of causal relations; (5) to bring to the student an intelligent and critically sympathetic understanding of his own and other people's civilization and culture. The Department does not aim to make specialists; rather it aims to give a comprehensive understanding of basic historical trends.

Prerequisites: For the History major, History 1-2, 3-4, plus twenty-four credit hours from upper division courses. The Department strongly recommends History 126-127, 118-119, 110-111, and 132 or 120 as the courses best designed to give the student that comprehensiveness of understanding which constitutes one of the major aims of the Department.

Hist. 1 & 2. *Political and Social History of the United States* — *6 credits*

A fundamental study of the history of the United States from the time of its European beginnings to the present, with special emphasis on the history of Pennsylvania. The first semester will analyze the period from our colonial origins to the end of the Civil War. The second semester will deal with the period of Reconstruction to the present. Required of all students for any degree from the University. This course also meets the requirements of the State for public school teaching. (Students who have not taken History 1 will not be allowed to take History 2.)
Fall and Spring

Hist. 3 & 4. *History of Modern Europe, 1500 to the Present* — *6 credits*

A study of European history with concentration upon the political aspects of European development. First semester: from the period of the rise of national monarchies to the Congress of Vienna. Second semester: from 1815 to the present. Continued emphasis will be placed on political developments but the significance of industrialism, the new nationalism and liberalism will be emphasized.
Fall and Spring

Hist. 110 & 111. *Medieval History* *6 credits*

A survey of medieval political and religious institutions. First semester: the origins and diffusion of Christianity; the contribution of imperial Rome; the emergence of political authority after the invasion and settlement of the barbarians; the spread of learning under monastic influence; the role of the Papacy; the achievements of the Crusades. Second semester: Decline of the Eastern Empire; the Holy Roman Empire; the Church in the period of Innocent III, the Renaissance of the twelfth and thirteenth centuries; the decline of medieval Europe before the secularization of thought in the field of politics, economics and religion.
Fall and Spring 1959-1960

Hist. 112. *Renaissance and Reformation* *3 credits*

An intensive study of Europe from the fourteenth to the middle of the seventeenth century. First quarter: study of humanism, the new wealth and the bourgeoisie; breakdown of medieval unity. Second quarter: the causes of the Protestant Revolution; Luther, Henry VIII, Calvin. The Catholic Reformation, religious wars, Peace of Westphalia.

Hist. 114. *French Revolution and Napoleonic Era* *3 credits*

First quarter: historical antecedents of the Revolution; the Philosophies; republicanism and the fall of the monarchy; Reign of Terror; France and Europe; the Directory. Second quarter: rise of Napoleon; the Consulate; internal achievements; intervention in Europe; significance of the Spanish and Russian campaigns; War of Liberation; Waterloo. Critical assessment of the period in the light of modern trends.

Hist. 116-117. *Europe in the Nineteenth Century* *6 credits*

The Congress of Vienna and the European restoration; the rise of national sentiment and its expression in revolutions; the Industrial Revolution and its social, political and colonial consequences. The unification of Italy and Germany; Russia; Mediterranean politics and the Eastern Question; international alliances and rivalries.

Hist. 118 & 119. *Development of Contemporary Civilization in Western Europe* *6 credits*

An analysis of the major economic, social and cultural aspects of European life since 1500. First semester: impact of the Protestant Revolution on European society; decline of medieval religious and economic unity; commercialism and the bourgeoisie; the intellectual revolution; antecedents of the French Revolution. Second semester: liberalism and reactions; fruits of the industrial revolution; march of the new sciences; socialism and communism; nationalism and imperialism; the twentieth century inheritance.

Hist. 120 & 121. *American Diplomatic History* *6 credits*

First semester: survey of the origins and development and functions of the State Department and its relation to other policy-forming agencies of the federal government. Diplomatic activities prior to 1789; the Louisiana Purchase; War of 1812; the Monroe Doctrine; Manifest Destiny. Second semester: Pan-Americanism, Cuba and the Caribbean, World War I; problems in the inter-bellum period; today's challenges and attempted solutions. United Nations Organization.

Fall and Spring 1960-1961

Hist. 122 & 123. *American Constitutional and Legal History* *6 credits*

First semester: the juridical concepts of the colonial and revolutionary periods; the historical backgrounds of the Federal Convention; the nature of the Constitution, its interpretation by Marshall and Taney. Second semester: the constitutional problems occasioned by the Civil War; the new amendments; the role of the States in a Federalist system. Key cases will be analyzed in detail and set in their proper historical perspective.

Fall and Spring 1959-1960

Hist. 124 & 125. *History of American Political and Social Thought* *6 credits*

An inquiry into the major philosophies which helped shape our institutions. First semester: Puritan concepts of liberty, property, and representation; views of the Independents; pre-Revolutionary society and thought and the growing adherence to the notion of independence; the Constitution as it represents a compromise between the conservative and liberal traditions; Jeffersonian and Jacksonian democracy; social, economic, and political ramifications of the slavery question. Second semester: triumph of the nationalist view and its implications; recent tendencies; the problem of liberty in the complex, highly technical American society.

Hist. 126-127. *Development of American Civilization* *6 credits*

An analysis of leading economic, social and cultural aspects of American life. First semester: study of the economic, religious and intellectual bases of colonial American life; impact of the Revolution; development of town and country life; sectional differences; the first factories and labor movements; growth of democracy and the reform movements. Second semester: study of the leading economic, social and cultural factors which shaped modern life and institutions since 1865. Among the topics treated are the growth of industry, agriculture and the agrarian discontent; the disappearance of the frontier; labor and immigration; literature and the arts; religious tendencies; diffusion of knowledge.

Fall and Spring 1959-1960

Hist. 128-129. *Special Topics in American History* *6 credits*
An analysis of selected topics in American political internal history from the Colonial Period to the end of the Nineteenth Century. Extensive readings are required. Restricted to History Majors.
Course offered by special arrangement

Hist. 130-131. *The United States in the Twentieth Century* *6 credits*
An intensive study of American development from 1900 to the present. Stress will be placed on the Roosevelt Era and its Progressivism, Wilson's New Freedom, diplomacy of the first World War, the return to "normalcy," the Great Depression and the New Deal, Roosevelt and world politics, and origins and consequences of World War II.

Hist. 132. *Co-ordinating Seminar in American History* *3 credits*
Intensive readings and reports on selected problems in American history. In all discussions an attempt will be made to integrate information in such terms as will give a unified picture of American life and institutions. Open only to Seniors working in History or by special permission from the Chairman of the Department. Normally History 1 & 2 and twelve additional credits from courses in American History and Politics will be prerequisites.

POLITICAL SCIENCE

For the Political Science major the Department aims to accomplish the following objectives: (1) to give the student a thorough understanding of the nature and purposes of civil society; (2) to impart a sound knowledge of the philosophical basis of democracy; (3) to enable him to appreciate the problems of his own government at work and (4) to relate the American system to the governments of other states in the international community.

Prerequisites: for the Political Science Major History 1-2; 3-4; Pol. Sci. 101-102 plus eighteen credit hours from upper division courses.

Pol. Sci. 101 & 102. *American National Government* *6 credits*
The course will begin with a analysis of such basic terms as society, state, authority and common good. Forms of government will be contrasted and evaluated. The constitution, federalism, structure, operations and functions of the three branches will then be studied.
Fall and Spring each year

Pol. Sci. 105. *State Government* *3 credits*
A general survey of the natural constitutional position of the states and the changing federal-state relationships will precede the detailed analysis of state governments in actual operation. Emphasis will be placed on Pennsylvania

and actual problems of procedure and policy will be used to illustrate general trends in state governments.
Fall 1959

Pol. Sci. 106. *Local Government* *3 credits*

Types of local government, evolution of the American township, county, borough and city from English prototypes; participation in local government and politics as a training school for democracy; constitutional and statutory limitations on local governments; efforts to preserve "home rule"; functions of local officials; budget, personnel, local taxation and assessment, purchasing, indebtedness, suggestions for improvement in structure and operation of local governments, especially those of Pennsylvania.
Spring 1960

Pol. Sci. 107. *Public Administration* *3 credits*

Nature of public administration; structures and limitations imposed through legislative statutes and appropriations; staff organization and flow of command; employment policies, personnel training and management; employee organization; public relations.

Pol. Sci. 120-121. *American Foreign Relations* *6 credits*

This course is identical with History 120-121.

Pol. Sci. 122-123. *American Constitutional and Legal History* *6 credits*

This course is identical with History 122-123.
Fall and Spring 1959-1960

Pol. Sci. 124-125. *American Political and Social Thought* *6 credits*

This course is identical with History 124-125.

Pol. Sci. 126. *The Political Parties of the United States* *3 credits*

An analysis of the origins, nature and functions of parties under our American system of government; the English tradition of the party system; differences between the English and American concepts. Jeffersonianism versus Hamiltonianism; sectionalism and pressure groups; splits in party organization prior to the Civil War; impact of the new industrial order on political alignments; the role of third parties in the United States; current stresses and strains on both major party organizations.
Spring 1959

DEPARTMENT OF MATHEMATICS

Mr. Bartley, *Chairman*; Mr. Holst, Fr. Powers, S.J., Mr. Savulis

The Department of Mathematics instructs students who are pursuing different courses of study and recognizes that the instruction must be adapted as much as possible to the needs of these students. For the Arts and Social Science students the objectives of the Department are: (a) to train the students in the basic and necessary skills of mathematics which will be required in nontechnical pursuits; (b) to bring out the cultural and applied values of mathematics; and (c) to show the dependence of other branches of knowledge on mathematics. In addition in the instruction of engineering and science students for whom mathematics is a tool subject the objectives of the Department are: (a) to develop skill and accuracy in mathematical operations; and (b) to familiarize the students with the methods of mathematical analysis. Finally for those students who show special aptitude for mathematics it is the objective of the Department to prepare them to pursue advanced work in this field.

A student may major in Mathematics either in the A.B. sequence or the B.S. sequence. The requirements for a major within the A.B. sequence include the following courses: Mathematics 13-14; 21-22; 101 plus fifteen additional upper division credits in Mathematics.

The requirements for a major in Mathematics within the B.S. sequence include Chemistry 1-2; Physics 11-12; 106-107; Mathematics 13-14; 21-22; 101-102; 103-104; Phys. 106-107; 108-109.

Fundamental Skills in Mathematics

An intensive review of college preparatory mathematics covering Algebra and Trigonometry. Required of all students who need additional preparation as determined by entrance tests in mathematics.
Three periods weekly—No credit—Fee $60.00.

Math. 7 & 8. *Fundamentals of Mathematics* *6 credits*

A course particularly designed for the students who do not expect to take mathematics beyond the first year. The aim of the course is to present the major ideas in the development of mathematics from ancient to modern times. Suitable application of these ideas to the physical and social sciences is indicated throughout the course. The importance of mathematical concepts for, and their relation to Logic, Philosophy, Art, the natural and social sciences and the history of civilization are discussed. Its primary objective is to emphasize fundamental ideas of the science and to furnish a foundation for an appreciation of its wider significance.
Fall and Spring each year

Math. 13-14. *Freshman Mathematics* *8 credits*

An intensified mathematics course covering the topics of Algebra, Trigonometry, Analytic Geometry and an introduction to the processes of differentiation and integration.
Fall and Spring each year

N. B. The material covered in Mathematics 8 and 13 is essentially the same. The differences are intensity of the latter course and the more thorough treatment of material. No student may offer both of these courses to satisfy his degree requirements.

Math. 21 & 22. *Calculus* *8 credits*

An integrated course covering the subjects of differentiation and integration. A coverage of the classical material of the calculus up to and including an introduction to infinite series. Prerequisite: Math. 14, or equivalent.
Fall and Spring each year

Math. 31. *Statistical Mathematics* *4 credits*

A course designed to present fundamental mathematical concepts necessary in Business and Educational Statistics: algebraic operations; linear; quadratic and simultaneous equations; exponentials and logarithms; theory of probability; loci; straight lines, circles, and certain conics; introductory treatment of the process of differentiation.

Math. 101. *Differential Equations* *4 credits*

A treatment of ordinary differential equations. First order, first and higher degree differential equations; special solutions; linear equations with constant coefficients and with variable coefficients; total differential equations; operator methods; approximate solutions; applications of differential equations to geometrical and physical problems; series solutions. For Mathematics, Physics and other science students. Prerequisite: Math. 22.
Fall and Spring each year

Math. 102. *Vector and Tensor Analysis* *3 credits*

The theory of vectors and their applications to the solution of mathematical and physical problems. Linear vector functions, and matrix applications. Elements of the theory of tensors. Prerequisite: Math. 101.
Spring each year

Math. 103. *Advanced Differential Equations* *3 credits*

This course includes the treatment of special differential equations and partial differential equations and their applications. Non-linear differential equations; linear partial differential equations of first and higher order; non-linear partial differential equations of first and second order. Recommended for Physics and Mathematics majors. Prerequisite: Math. 101.
Spring 1961

Math. 104. *Introduction to Statistical Analysis* *3 credits*

Curve plotting; frequency curves, averages, measures of dispersion, theory of correlation. Applications to the natural and social sciences. Prerequisite: Math. 22.
Fall 1960

Math. 105. *History of Mathematics* *3 credits*

Treats of the development of Mathematics from earliest times through the Calculus. Prerequisite: Math. 22.
Course given by special arrangement

Math. 106. *Advanced Calculus* *3 credits*

A critical study of the foundations of differential and integral Calculus; further study of the mean value theorem; series; representation of various functions in terms of power series; partial and directional derivatives of functions of several variables; space integrals, Green's and Stoke's theorems; elementary treatment of functions of a complex variable. For Physics and Mathematics majors. Prerequisite: Math. 101.
Fall each year

Math. 107. *Advanced Calculus* *3 credits*

An introductory treatment of special types of series and integrals including elliptic integrals, Fourier series and functions, Gamma and Beta functions, Bessel functions, and further treatment of functions of a complex variable. Recommended for Physics and Mathematics majors. Prerequisite: Math. 106.
Spring each year

Math. 108. *Modern Algebra* *3 credits*

An introduction to some of the simpler algebraic concepts. The number system and elementary theory of numbers. Groups, rings, polynomials over a field, matrices and determinants. Prerequisite: Math. 22 or permission of department head.
Spring 1960

Math. 109. *Theory of Equations* *3 credits*

An introduction to the theory of solution of various equations. In addition the course tends to introduce the student to many of the concepts of modern algebra. Theory of determinants and matrices is applied early in the course. Prerequisite: Math. 22.
Fall 1959

Math. 110. *Selected Topics in Advanced Mathematics* *4 credits*

This course is designed particularly for the electronics majors. Laplace transforms applied to the solution of differential equations; power series; Fourier series; Bessel functions; functions of a complex variable; vectors; vector methods. Prerequisite: Math. 101.
Spring each year

Math. 113-14. *Mathematics Seminar* *Variable Credit*

A seminar course covering modern developments in Mathematics as applied to Algebra and Analysis. Primarily for teacher preparation, this course is designed to allow the student of demonstrated ability to cover the topics involved without benefit of formal lectures. Prerequisite: Permission of the department head.

Math. 115. *Undergraduate Mathematics Thesis* *Variable credit*
For those who apply for the B.S. Degree with a major in mathematics. To evaluate the student's ability to carry out the investigation of a specific mathematical topic. The credit value will be one or two credits depending upon the results accomplished and time involved. Prerequisite: 24 credits in mathematics.
Course given by special arrangement

DEPARTMENT OF MILITARY SCIENCE AND TACTICS

Lt. Col. Louis J. Aebischer, Chairman; Major John B. Brady,
Capt. Richard E. Mack, Major John McCreary,
Capt. Clifford J. Phifer and military staff

The primary objective of the ROTC program is to produce junior officers, who, by their education, training and inherent qualities, are suitable for continued development as Regular or Reserve Officers in the United States Army.

As a means to this objective, all physically qualified students regularly enrolled in the University, except those excused from the requirement by the President of the University and those excused by reason of prior military service, are required to complete the first two years, the Basic Course, of the ROTC program.

Enrollment in the third and fourth year, the Advanced Course, of the ROTC program is limited to those students who have successfully completed the Basic Course or are veterans of the Armed Forces. These students volunteer for further ROTC training and are selected by the President of the University and the Professor of Military Science and Tactics. With successful completion of the Advanced Course, which includes a six week ROTC summer camp at the end of the Junior year, and upon graduation from the University, the graduate is offered a Regular Army or a Reserve Commission. In the case of those receiving a Reserve Commission as a Second Lieutenant in the United States Army, the period of active duty is either six months or two years, depending upon selection by the individual and the needs of the service.

Uniforms and textbooks are supplied without cost to Military Science students. In addition, each Advanced Course student is paid approximately $27 per month while in school and $78 per month, plus travel expenses, while at summer camp. The total received by the student completing the Advanced Course amounts to over $600.

The commissions offered to successful graduates of the Advanced Course may be in any branch of the Army, based on the student's choice, his educational background, and the needs of the service.

Military Science students will be required to participate as a unit in University directed activities at least once every semester. Such events will include the Veterans' Day parade, Home Coming Day Football Game, Armed Forces Day parade and other events in which the University officials desire to have the Cadet Corps present. Some of these events will be at times other than

normal school days or hours. Participation is required and will be considered a regularly scheduled class for attendance purposes.

M. S. 11 & 12. *First Year Basic, General Military Science* *4 credits*

Introduction to military science; military organization, history of the ROTC; American military history, colonial to present; individual weapons and marksmanship; school of the soldier and exercise of command. Two hours class work and a minimum of one hour a week of drill.
Fall and Spring

M. S. 21 & 22. *Second Year Basic, General Military Science* *4 credits*

A comprehensive study of crew-served weapons and related gunnery; map and aerial photograph reading; school of the soldier and exercise of command. Prerequisite: MS 1 and 2, or equivalent advanced standing. Two hours class work and a minimum of one hour a week of drill.
Fall and Spring

M. S. 101 & 102. *First Year Advanced, General Military Science* *6 credits*

A comprehensive study of small unit tactics and communication, organization, function and mission of all arms and services; military teaching methods; leadership; school of the soldier and exercise of command. Prerequisite: MS 1 and 2, 3 and 4, or equivalent advanced standing. Four hours class work and a minimum of one hour a week of drill.
Fall and Spring

M. S. 110 & 111. *Second Year Advanced, General Military Science* *6 credits*

A comprehensive study of the following: logistics; operation to include command and staff, combat orders, military intelligence, the military team and training management; military administration and military justice; service orientation to include, the role of the United States in world affairs, leadership, and officer indoctrination, school of the soldier and exercise of command. Prerequisite: MS 5 and 6. Four hours class work and a minimum of one hour a week of drill.
Fall and Spring

DEPARTMENT OF MODERN LANGUAGES

Mr. Cimini, *Chairman*; Fr. Budovic, S.J., Dr. Kilker, Dr. Kucas, Dr. Lew, Mr. Long, Mr. Mastri, Dr. Persichetti

The Modern Language Department undertakes:

1. to give the student who plans to pursue studies in business, science, the arts or the professions the requisite skills for reading, writing and speaking foreign languages.

2. to train the student in logic and precision of thought and expression by comparative study of his own and foreign languages.

3. to develop the aesthetic and critical faculties of the student by the reading and appreciation of the best foreign authors.

4. to give the student an insight into the evolution of European thought and the history and culture of Europe as reflected in its literature.

At the beginning of the freshman year a placement test is given to students offering two years or more of high school credit in a modern language. Students passing this test will be admitted to the intermediate course in that language. Students failing in this test, and students admitted with less than two units in a language, are required to take the elementary course in that language.

A major in a Modern Foreign Language requires the completion of Modern Language 21-22 plus twenty-four credits in upper division courses in that language. Major sequences are possible only in French, German and Spanish.

French

French 1 & 2. *Elementary French* — *6 credits*

A course designed to impart a solid foundation in grammatical principles and the mastery of a basic vocabulary; reading and composition, especially written.
Fall and Spring each year

French 21 & 22. *Intermediate French* — *6 credits*

A course which includes a review of French grammar and an introduction to French literature and civilization by the reading and discussion of appropriate works. (This course is conducted in French.)
Fall and Spring each year

French 101 & 102. *The French Short Story* — *6 credits*

Reading and discussion of representative works of short fiction from the 18th Century to the present day.
Fall and Spring 1959-1960

French 103 & 104. *Seventeenth Century French Literature* — *6 credits*

Authors of the 17th century are read and discussed. A study is made of the classical movement in French thought and culture, with emphasis given to such authors as Corneille, Racine, Molière and Boileau.

French 105 & 106. *Eighteenth Century French Literature* — *6 credits*

The course of the French Enlightenment from the *libertins* to the Revolution.

French 107 & 108. *Nineteenth Century French Literature* *6 credits*

The main currents of French literature and thought from the romantic reaction to the emergence of symbolism.
Fall and Spring 1960-1961

French 110 & 111. *History of French Literature* *6 credits*

The main lines of the evolution of French culture as seen in the literature of the country from the twelfth century to the contemporary period, the whole studied against the background of the aesthetic, philosophical, political, social and economic development of European civilization in general.

French 115 & 116. *History of French Civilization* *6 credits*

A course given jointly by the Departments of Modern Languages and of History; the study of the rôle of France in the political, economic, social and intellectual development of the West. If conditions warrant, this course may be given in English.

French 123 & 124. *Advanced French Grammar and Conversation* *6 credits*

A course which includes: a thorough study of French grammar; composition, oral and written, free and by translation from the English; study of the inter national phonetic alphabet and practice in public speaking in French.
Fall and Spring 1960-1961

French 125. *Scientific French* *3 credits*

A course desgned to prepare the student for library research in French in the fields of the biological and physical sciences. Readings. This course may be conducted in English.
Course offered by special arrangement

French 130. *Undergraduate Research Thesis in French Literature* *1 credit*

Open to students of proven ability in French. Assignment of the problem to be arranged in each case. Prerequisite: French 21 or equivalent.
On request

German

Germ. 1 & 2. *Elementary German* *6 credits*

A complete course in the fundamentals of the German language. Emphasis on reading of graded texts, with written, oral and aural exercises.
Fall and Spring

Germ. 21 & 22. *Intermediate German* *6 credits*

Reading from modern authors of moderate difficulty. Oral and written exercises. Systematic review of German grammar. Prerequisite: See general introduction.

Fall and Spring

Germ. 103 & 104. *History of German Literature from its Origins to the Seventeenth Century* *6 credits*

Lectures in German, with collateral reading in modern German of the Nibelungenlied, Hartmann von Aue, Wolfram von Eschenbach, and others. Discussion, written and oral reports.

Fall and Spring 1959-1960

Germ. 105 & 106. *Eighteenth Century Literature* *6 credits*

A study of the lives and works of Lessing, Goethe, and Schiller, including a survey of the intellectual background of the period.

Fall and Spring 1960-1961

Germ. 107 & 108. *Nineteenth Century Literature* *6 credits*

German Dramas and Novellen by selected authors /writers/.

Germ. 123 & 124. *Advanced German* *6 credits*

Selected texts in prose and poetry. Advanced practice in conversation and composition

Fall and Spring 1960-1961

Germ. 125 & 126. *Scientific German* *6 credits*

The aim of this course is to give the preprofessional and science student a general, well rounded knowledge of Scientific German. Readings are selected from the fields of Physiology, Botany, Zoology, Chemistry and Physics, and take on the aspect of a survey of general science, thus preparing the student directly for further work in German in his own particular field.

Course offered by special arrangement

Spanish

Span. 1 & 2. *Elementary Spanish* *6 credits*

Aim: solid foundation in grammatical principles and mastery of a basic vocabulary. The course includes intensive drill in pronunciation, active use of vocabulary and grammatical principles in written and oral exercises.

Fall and Spring

Span. 21 & 22. *Intermediate Spanish* *6 credits*

Aim: increased facility in active use of basic grammar and vocabulary, enlarged reading ability, and an introduction to Spanish and Spanish-American civilization. The course includes grammatical review, written and oral composition, reading of selected modern prose of intermediate difficulty. Prerequisite: Span. 1 & 2.

Fall and Spring

Span. 101 & 102. *The Modern Novel* *6 credits*

A study of the short story and novel of Spain and Spanish-America in the late 19th and early 20th centuries. Readings in the most important authors, with background lectures on the history of the novel and discussions in Spanish.
Fall and Spring 1959-1960

Span. 104 & 105. *Commercial Spanish* *6 credits*

A study of vocabulary and forms used in commerce. Practice in writing of letters and other business forms. Reading of Spanish models as a basis for free composition. Oral practice in Spanish.

Span. 106 & 107. *The Golden Age* *6 credits*

A study of the development of the novel, with the culmination of all forms in Cervantes; and of the drama, reaching its perfection in Lope de Vega and Calderon. Readings in the major authors.

Span. 108. *Conversational Spanish* *3 credits*

A course designed to enable the student to express himself in Spanish with clarity and fluency. Stress placed on pronunciation, idiomatic use of the language, and practice in oral composition. Course conducted in Spanish.

Span. 109 & 110. *History of Spanish Civilization and Literature* *6 credits*

A survey of the political, artistic, literary and scientific progress of Spain, with readings of each period. Prerequisite: Spanish 21 and Spanish 22.
Fall and Spring 1960-1961

Span. 123 & 124. *Advanced Grammar and Conversation* *6 credits*

A course which includes a thorough study of Spanish grammar; composition, oral and written, with the aim of developing the ability to write clear and fluent Spanish. Stress placed on pronunciation, idiomatic use of the language, and practice in oral composition.
Fall and Spring 1960-1961

Italian

Italian 1 & 2. *Elementary Italian* *6 credits*

This course is intended for those who begin Italian in college. Principles of Italian grammar, practice in reading, writing and speaking Italian. Its aim is to enable students to read ordinary Italian with ease and to understand to some extent the spoken language.
Taught in Evening Session only

Italian 21 & 22. *Intermediate Italian* *6 credits*

Aim: increased facility in active use of basic grammar and vocabulary, enlarged reading ability, and an introduction to Italian and Italian-American civilizaton. The course includes grammatical review, written and oral composition, reading of selected prose of intermediate difficulty. Prerequisite: Italian 1 and 2, or equivalent.

Taught in Evening Session only

Polish

Polish 1 & 2. *The Polish Language* *6 credits*

Fundamentals of grammar, reading and composition in modern Polish.

Taught in Evening Session only

Polish 21 & 22. *Intermediate Polish* *6 credits*

Increased facility in active use of basic grammar and vocabulary, enlarged reading ability, and an introduction to Polish and Polish-American civilization. The course includes grammatical review, written and oral composition, reading of selected modern prose of intermediate difficulty. Prerequisite: Polish 1 and 2, or equivalent.

Taught in Evening Session only

Russian

Russian 1 & 2. *Elementary Russian* *6 credits*

Principles of the grammar of Great Russian. The object is to obtain speaking and writing knowledge of standard Russian by reading, conversation, and written and oral exercises.

Fall and Spring

Russian 21 & 22. *Intermediate Russian* *6 credits*

Further vocabulary building, review grammar, oral and written exercises and composition, enlarged reading ability based on graded texts and selected modern prose of intermediate difficulty. Prerequisite: Russian 1 and 2.

Fall and Spring

DEPARTMENT OF PHILOSOPHY

Fr. Jarvis, S.J., *Chairman*; Mr. Connolly, Fr. Gibbons, S.J., Fr. McNicholas, S.J., Fr. McSorley, S.J., Fr. Suppe, S.J., Fr. Tome, S.J., Fr. Vendler, S.J.

The aim of education is to equip the student with a mature, reflective and receptive outlook on life. Philosophy's role in pursuing this goal lies in providing, as far as man's reason can, a comprehensive view of the basic structure and meaning of reality. Philosophy is at once distinct from the positive sciences in its methodology and at the same time it provides the integrating principles whereby man can properly interpret the universe in which he lives. Consequently the philosopher must be able to think clearly and express himself accurately. But he must also possess an intelligent appreciation of all the major attempts by man to answer his perennial questions.

The broad principles of the Scholastic tradition will be proposed as the point of departure and rational framework for that ideal total wisdom which is docile to every manifestation and revelation of the true and the good.

Students wishing to major in Philosophy must take the Philosophy courses required of all students, and in addition Philosophy 113-114, History of Philosophy for a total of 32 semester hours. Since required courses constitute 26 hours of this major, students majoring in Philosophy must carry a second major, fulfilling departmental requirements as listed.

Phil. 101. *Introduction to Logic* *3 credits*

Logic is the science of correct thinking. It is concerned with those relations which obtain between terms and propositions as such, regardless of the particular objects to which they refer. Hence it is a prerequisite not only to philosophy but to all sciences. The traditional logic of Aristotle, as developed by the Stoics and scholastic philosophers, is presented as the best introduction to logic.

Fall each year

Phil. 102-104. *The Philosophy of Being* *8 credits*

This course includes what is also called metaphysics and natural theology. The meaning of being is scientifically presented through analysis of the traditional problems of change and the one and the many. This includes consideration of the analogy of being, the relation between essence and existence, form and matter, substance and accident, powers and action. The study of change leads to a study of relations and to the extrinsic causes of becoming, the efficient and final causes. Casuality leads logically, as it did historically, to the existence of God. God, as first cause, is studied as the crowning theme of the philosophy of being. This includes a study of God's attributes, His action in His creatures, the problem of evil, and the ulterior meaning of being, truth and goodness.

Phil. 105. *Philosophy of Man I* *4 credits*

The philosophical consideration of man begins with the delineation of the philosophic as contrasted with the scientific study of man. Throughout, the two disciplines will be kept clearly distinct but, for the total picture of man, an integration of the two will be sought. This course will study life in general, its nature and origin, and plant and animal life in particular. The specific study of man will begin with a study of human sense life and an empirical study of man's rational life. Prerequisite: Phil. 102-103.

Fall each year

Phil. 107. *Philosophy of Man II* *2 credits*

A. Human Rational Life — This course will study man's suprasensual powers, the intellect and will and freedom of choice. The nature and attributes of the human soul itself will complete this analysis of the constitution of man. Finally, man will be viewed integrally in the study of him as a person. The psychoanalytic theory and the experimental approach to character will be

assessed and the philosophical implication of human personality will be explored. Prerequisite: Phil 105
Spring each year

Phil. 108. *Philosophy of Man III* *2 credits*

B. Man's Knowledge of Reality—This treatise will be considered the climax of our philosophical program. The reality and the certainty of the knowledge to be gained from philosophy, from modern sciences, especially modern physics, and from mathematics will be examined and compared. The courses will be a point of contact and integration of philosophy with science and modern writers on both subjects. The epistemological problem is complex for man has various types of levels of cognition. The nature, validity, and interrelationship of these different levels is the philosophical question today and one's ability to differentiate and evaluate the hierarchy of sciences in the unity of consciousness marks his philosophical maturity. Descartes, Kant, Comte are some of the key figures in the understanding of the various types of realism, idealism, empiricism, logical positivism and scientism which must be assessed in their relation to Scholastic Philosophy. Prerequisite: Phil. 107.
Spring each year

Phil. 110. *Philosophy of Human Conduct I: Ethical Theory* *4 credits*

In pursuit of a philosophical validation of the ethical fact, this course will, as a preliminary, study the purpose of human existence and the nature and constitution of responsible human action. Ethics properly concerns itself with the standard of moral goodness and evil and of moral obligation. This latter involves an understanding of the nature and properties of the natural moral law. The relations of moral law to concrete acts entails a study of conscience and virtue. A consideration of the nature of rights and duties affords a link with applied ethics. Prerequisite: Phil. 102-103-104.
Fall each year

Phil. 111. *Philosophy of Human Conduct II: Individual and Social Ethics* *4 credits*

The philosophy of human conduct is here applied to the activities of individuals and societies. This entails, firstly, a consideration of the moral implications of man's relation, primarily viewed as an individual, to God as the object of religion and to himself as a being equipped with a variety of powers. Since it is difficult to isolate any human conduct from society, the final and largest section of this course will concern itself specifically with man as a social being. The nature and origin of society in general and the societal character of marriage will receive due treatment. Emphasis will be placed on civil society, its origin, authority, and extension. This will also entail laying the ground principles of morality for the various professional fields and for industrial problems. The question of international community will complete the picture. Prerequisite: Phil. 110.
Spring each year

Phil. 113. *History of Philosophy: Ancient and Medieval* *3 credits*
A survey of the History of Philosophy from its beginnings in the West to its Scholastic flowering in the Middle Ages. The various problems will be seen in their origins and traced through the master philosophers; Socrates, Plato, Aristotle, St. Augustine, St. Thomas Aquinas. Included will be a continuous discussion of the inter-relations of philosophy with the arts, the sciences and practical life.

Phil. 114. *History of Philosophy: Modern and Recent* *3 credits*
The development of modern thought, from Bacon and Descartes, through Spinoza, Leibnitz, Hobbes, Locke, Berkeley and Hume to Kant and Hegel. Neo-Scholasticism and its relation to other contemporary philosophical movements

DEPARTMENT OF PHYSICS

Dr. Harper, *Chairman*; Dr. Duffy, Mr. McGinnis, Dr. Radle

The science of Physics is concerned principally with matter and energy, the nature of each, and with their interactions. It is the fundamental science for most branches of engineering and has innumerable applications in medicine, industry and everyday life. The objectives of the Department of Physics are: (1) to impart a body of knowledge of the general principles of Physical Science and to show their applications to human problems; (2) to aid the student in acquiring scientific method and in developing a quantitative frame of mind in dealing with his problems; (3) to train the student in logical and accurate methods of observation, measurement and analysis; (4) to provide the student with adequate training in the fundamentals of Physics to enable him to pursue medical, engineering and other courses of study; (5) to encourage and train those students who show exceptional aptitude for the science of Physics for a career in the teaching of Physics, or in industrial work in this field, and to encourage those students who have the capacity to pursue graduate work in Physics.

Phys. 1 & 2. *General Physics* *8 credits*
For pre-medical, pre-dental and other students who need one year of college physics. First semester: mechanics and heat. Second semester: electricity and magnetism, sound and light. Three hours lecture and recitation and two hours laboratory. Prerequisites: Math. 13 and 14.
Fall and Spring each year

Phys. 11 & 12. *Elements of Physics* *8 credits*
A basic college course, designed for Physics and Electronics major in which methods of the calculus are applied. First semester: mechanics and heat. Second semester: sound, light, electricity and magnetism. Three hours lecture and recitation and two hours laboratory. Corequisite: Math. 21 and 22.
Fall and Spring each year

Phys. 18. *Elementary Mechanics* *4 credits*

An elementary treatment of the statics and dynamics of particles and rigid bodies, elastic bodies, hydrostatics and hydrodynamics. For engineering students. Three hours lecture and recitation and two hours laboratory. Prerequisite: Math. 13.

Spring each year

Phys. 19. *Elementary Heat, Light and Sound* *4 credits*

Basic treatment of the effects of heat, thermometry, calorimetry, transfer of heat and elementary thermodynamics; periodic motions, vibrating bodies, sound waves and acoustics; photometry, reflection and refraction of light, interference, polarization, color and spectra. For Engineering students. Three hours lecture and recitation and two hours laboratory. Prerequisite: Physics 18.

Fall each year

Phys. 20. *Elementary Electricity and Magnetism* *4 credits*

Basic treatment of magnetism, electrostatics, direct currents and circuits, electromagnetic induction, alternating currents and circuits, electrical machines and devices, electromagnetic waves; introductory electronics and atomic physics. For Engineering students. Three hours lecture and recitation and two hours laboratory. Prerequisites: Physics 18; Math. 14.

Spring each year

Phys. 25. *Radiological Science* *3 credits*

This course is designed for science majors, engineering students and others and includes the topics: structure of matter; radioactivity; detection of particles and rays; energy measurements; radiological safety procedures. Two lecture periods and one three-hour lab period per week. Prerequisites: college mathematics, chemistry and physics. (Math. 13-14, chemistry 1-2, physics 1-2 or equivalent.)

Phys. 101. *Heat and Thermodynamics* *3 credits*

An intermediate course covering the topics of conduction, convection and radiation, the first and second laws of thermodynamics, entropy, thermodynamic cycles, the steam engine, refrigeration, thermodynamic functions and applications of thermodynamics; practice in the use of steam tables and charts. A brief treatment of kinetic and statistical theory of gases is included. This course is recommended for Physics majors. Three hours lecture and recitation. Prerequisites: Physics 12 or 19; Math. 22.

Fall 1958

Phys. 102. *Mechanics* *3 credits*

An introduction to theoretical mechanics which deals with the statics and dynamics of particles and extended bodies. It covers the topics of motion of bodies under the influence of conservative and dissipative forces, momentum and energy relations, theory of potential, generalized co-ordinates and La-

grange's equations of motion. This course is recommended for physics majors. Three hours lecture. Prerequisites: Physics 11, or 18; Math. 101.
Spring each year

Phys. 103. *Light and Optics* *4 credits*

A second course of light which treats geometrical and physical optics in greater detail than in the elementary courses. The topics include lenses and mirrors, refraction of light at surfaces, dispersion, lens combinations, optical instruments, spectra, interference, diffraction and polarization. The laboratory exercises are to acquaint the student with the handling and use of optical instruments in making optical measurements. Three hours lecture and three hours laboratory. Recommended for Physics and Electronics majors. Prerequisites: Physics 12 or 19, and Math. 22.
Fall each year

Phys. 104. *Electricity and Magnetism* *4 credits*

An analytical treatment of electrical and magnetic theory including the topics of electrostatic fields, direct electric current circuits and measurements and magnetism. Required of Physics majors. Three hours lecture and two hours laboratory. Prerequisites: Physics 12, or 20; Math. 101 (can be taken concurrently).
Fall each year

Phys. 104E. *Introduction to Electromagnetics* *4 credits*

A one-semester intermediate electricity and magnetism course designed particularly for the electronics majors including the topics of electrostatic field theory, magnetic fields, Maxwell's equations and applications to electromagnetic wave propagation. This course is required of Electronics majors. Three hours lecture and two hours laboratory. Prerequisites: Physics 12 or 20, Math. 22.
Fall each year

Phys. 105. *Electricity and Magnetism* *4 credits*

A continuation of Physics 104. The topics include electromagnetic induction, transients, alternating current circuits and measuring instruments and electromagnetic fields and waves. Required of Physics majors. Three hours lecture and two hours laboratory. Prerequisites: Physics 104; Math. 101.
Spring each year

Phys. 106. *Electron Tubes and Circuits* *4 credits*

The fundamental course on electron tubes and circuits. General principles of vacuum tube operation; power supplies and filters; electron tube characteristics; simple amplifiers; general amplifier theory; tuned circuits. This course is required of Electronics majors and recommended as an elective for the Physics majors. Three hours lecture and two hours laboratory. Prerequisites: Physics 12, or 20; Math. 22.
Fall each year

Phys. 107. *Electron Tubes and Circuits* *4 credits*

A continuation of Physics 106. Power amplifiers, analytical and graphical methods; oscillators, modulators and detectors; radio and television circuits; computer circuits; theory and applications of transistors. Three hours lecture and two hours laboratory. This course is required of Electronics majors. Prerequisite: Physics 106.
Spring each year

Phys. 108. *High Frequency Electromagnetic Wave Transmission* *4 credits*

Transmission of UHF signals; characteristics of transmission lines; theory of UHF measurements; electromagnetic wave theory. For Electronics majors. Three hours lecture and two hours laboratory. Prerequisites: Physics 107; Physics 104E; Math. 101.
Fall each year

Phys. 109. *Microwave Theory and Circuits* *4 credits*

Theory of microwave transmission through waveguides; microwave tubes and signal generators; microwave measuring instruments, receivers and transmitters; radar systems. For Electronics majors. Three hours lecture and two hours laboratory. Prerequisites: Physics 108; Math. 110.
Spring each year

Phys. 110. *Modern Physics* *3 credits*

A mathematical treatment of various phases of modern Physics which includes the topics of kinetic theory, electrical discharges in gases, electron theory, atomic structure, atomic spectra, x-rays and other electromagnetic radiations. This course is required of Physics majors. Three hours lecture. Prerequisites Physics 104 and 105; Math. 101.
Fall 1960

Phys. 111. *Modern Physics* *3 credits*

A continuation of Physics 110. This course is devoted to the treatment of quantum theory, photoelectricity, radioactivity, nuclear particles, nuclear reactions, induced radioactivity, nuclear instrumentation and cosmic rays. This course is required of Physics majors. Three hours lecture. Prerequisite: Physics 110.
Spring 1961

Phys. 112. *Sound* *3 credits*

An intermediate course which correlates principles and techniques of sound, light, electricity and mechanics. Vibration theory, wave transmission in different media, interference and diffraction and acoustic impedance are some of the topics illustrating this interrelationship. Reflection and absorption of sound waves; reproduction of sound, and loudspeakers. Architectural acoustics.

This course is required of Electronics majors and recommended for Physics majors. Three hours lecture. Prerequisites: Physics 12 or 20; Math. 101.
Spring each year

Phys. 114. *Advanced Physics Laboratory* *1 credit*
An introduction to advanced experimental techniques and devices which includes experiments in the fields of electricity, electron characteristics, optics, heat radiation and conduction, thermionic and photo-electric emission. Required of Physics majors. One three-hour laboratory. Prerequisite. Physics 105.
Fall 1960; Fall each year

Phys. 115. *Advanced Physics Laboratory* *1 credit*
A continuation of Physics 114 with emphasis on nuclear radiation measurements including experiments on radioactive decay, particle and ray detection and energy measurement, ionising effects of radiation, neutron detection and induced radioactivity. For Physics majors. One three-hour laboratory period. Prerequisites: Physics 110 and 114.
Spring 1961; Spring each year

Phys. 120. *Undergraduate Physics Thesis* *1 credit*
Recommended for those who apply for the B.S. degree with a major in Physics. This work is to evaluate the student's capacity for individual study and research in connection with a specific physical problem. Assignment of the problem and credit to be arranged in each case. Prerequisites: 24 credits in Physics; 20 credits in Math.
Course offered by special arrangement

DEPARTMENT OF SOCIAL SCIENCES

Mr. Baldi, *Chairman*; Mr. O'Keefe, Mr. Schneck, Mr. Sheehan, Mr. Walsh

Purpose: To provide both terminal and prospective graduate students with a basic understanding of the sociological and economic forces which are a part of the structure of our society. The Economics courses are intended for all Social Science majors and Business Administration majors. Courses in Sociology are intended for all Social Science majors. Within the Sociology major there is an opportunity for those interested in social work to follow a pre-professional orientation to the field.

A major in Economics shall consist of Economics 23 and 24, 25 and 26, plus twenty-four elective credits in Economics, including Bus. 103, 104, 105, 106.

A major in Sociology shall consist of Sociology 21 and 22, plus twenty-four elective credits in Sociology. Certain Psychology courses may be substituted for some of these elective credits with the authorization of the Chairman of the department.

Econ. 23. *Principles of Economics* *3 credits*

An introduction to the principles of economic theory and their application to present day problems. Economic organization of the U. S.; consumption, production and marketing, money and credit, prices, wage theories, and the relation of employer and employed, capital and interest, rents, profits and taxation.

Fall each year

Econ. 24. *Principles of Economics* *3 credits*

Continuation of Econ. 23. Analysis of national income and spending, monetary and fiscal policies as an aid to controlling business cycles; foreign exchange and trade, analysis of modern capitalism and alternative economic systems. Prerequisite: Econ. 23.

Spring each year

Econ. 25. *Financial Statement Analysis* *2 credits*

Meaning and purpose of accounting; detailed study of balance sheet, profit and loss statements, business papers and negotiable instruments, work sheet and summary statements. Open only to Economics majors. Prerequisite: Econ. 24.

Fall each year

Econ. 26. *Financial Statement Analysis* *2 credits*

Continuation of Econ. 25. Partnership formation and operation, financial statements of partnerships; partnership dissolution and liquidation, organization and operation of corporations. Detailed study of classification and accounting procedures, capital stocks, bonds, mortgages, sinking funds and reserves. Analysis and interpretation of corporate financial statements. Prerequisite: Econ. 25.

Spring each year

Econ. 102. *History of Economic Thought* *3 credits*

This course is a survey of the wide field of economic thought. Particular stress is placed on the economic and socio-political factors of the time. Prerequisite: Econ. 24.

Fall each year

Econ. 103. *Economic Geography* *3 credits*

A study of the physical environment which in a large sense sets the stage for all economic activities. Specifically, the influence of climate, land forms and soils and their distribution on the surface of the earth are investigated. Emphasis is placed upon the relation of physical factors and economic conditions to the production and exchange of the world's leading commercial products. The North American, South American and European continents are studied, with emphasis being placed on their relationship to the United States. Prerequisite: Econ. 24.

Spring each year

Econ. 104. *American Economic Development* *3 credits*

The background of European expansion in America. The American Revolution as a social movement. The economic forces that conditioned the development of the United States prior to 1860. The economic basis of Southern Secession and the breakdown of the confederacy. The economic aspects of the reconstruction policy, agriculture and agrarian discontent. The emergence of large-scale enterprise and its attendant problems. The development of the United States as a major world power. The economic and social problems of World War I and the post-war period. The great depression, boom, World War II and post-war inflation periods and problems of current significance. No prerequisite.
Fall each year

Econ. 105. *Labor Law and Legislation and Industrial Relations* *3 credits*

The study of the economic forces which have engendered labor legislation, and a case analysis of the effect of resulting conditions on employer-employee relations. A survey of the Acts of Congress of the United States and of the legislature of the Commonwealth of Pennsylvania in the field of industrial relations. Evolution of legislation, the history of industrial disputes and the influence upon labor-management relations. Summary of the history, theory and evolutions of labor combinations. Management as evidenced by Federal and State legislation and court decisions. Early doctrines. Structure and purpose of labor combinations. Labor injunctions. Lawful and unlawful striking and picket activity. The Clayton Act. The Norris-LaGuardia Act. Prerequisite: Econ. 24.
Fall each year

Econ. 106. *Labor Law and Legislation and Industrial Relations* *3 credits*

Continuation of Econ. 105. The Boycott. Labor and the Sherman Act. The National Labor Relations Act. The Railway Labor Act. Incidents of union membership. State laws. The Fair Labor Standards Act. Prerequisite: Econ. 105.
Spring each year

Econ. 150. *Labor Problems* *3 credits*

History of labor as a social and economic group; development and philosophy of trade unions; labor legislation; methods of dealing with insecurity and inadequate income; organizational and jurisdictional problems of unions; labor-management relations. Each student will complete a project applying a definite phase of the course to an assigned problem.
Spring each year

Soc. 21. *Basic Sociology* *3 credits*

An introduction to basic sociological principles covering the basis, structure, and functions of society. Man's biological and cultural heritage and his social nature, demography, ecology, types of communities; the social processes of competition, conflict, co-operation, accommodation and stratification and their relationship to social control, the family, economic, governmental and religious institutions.

Fall each year

Soc. 22. *Social Problems* *3 credits*

An analysis of the major social problems affecting modern society. Poverty dependency, physical illness and handicaps, mental deficiency, mental and emotional illnesses, problems of old age, family breakdown, transiency, housing, crime and delinquency, standards of living and race problems. Social legislation bearing on the above, resources for treatment and prevention, and deficiencies in existing programs.

Spring each year

Soc. 103. *Criminology and Penology* *3 credits*

Contributions of the various schools of thought to the development of the science of criminology. Physical, psychological and environmental factors in crime. The role of the home, family and social relationships.

The methods and instrumentalities of criminal justice, the police, courts, prisons, probation and parole will also be discussed, as will a program of crime prevention.

Fall 1958, Spring 1960

Soc. 104. *Social Origins* *3 credits*

A survey of the present state of knowledge in the field of cultural anthropology. Analysis of the modern primitive cultures for the light they shed on the possible stages in man's cultural acquisitions. The social, economic, religious and political structures and processes in various contemporary primitive societies and the corresponding structures and practices in modern civilization.

Fall 1958

Soc. 105. *Sociological Theories* *3 credits*

A survey of the development of sociological principles beginning with Comte and including a comparison of the modern major schools of thought such as the mechanistic, geographical, demographic, biological, economic, sociologistic and integrative.

Course offered by special arrangement

Soc. 106. *Community Organization* *3 credits*

The course aims at a general introduction to the field and process of community organization, both as a field of social work, and as a field of human endeavor. Stress is laid on the co-ordination and financing of welfare activi-

ties, methods of appraising community needs and resources, welfare planning and the initiation of welfare services. Local, state, regional, national and international services of a voluntary and governmental nature will also be discussed.
Fall 1959

Soc. 107. *Child Welfare* *3 credits*
Philosophy and development of child welfare in the United States. Educational, health, recreational and child labor regulations. Study and treatment of dependent, neglected, delinquent and illegitimate children in their own homes, foster homes and institutions. The administration of child care and protective programs on Federal, State and local level.
Spring each year

Soc. 109. *The Field of Social Work* *3 credits*
Growth of social work as a professional endeavor. The scope of social work; case work in the medical, psychiatric, family and child welfare and guidance field; community organization as exemplified in the community chest and council, social research, social planning, social group work. Evolution of training for social work. Schools of social work, national associations, number of social workers, demand for social workers, salaries. Current trends in social work.
Spring 1960

Soc. 110. *Marriage and Family Life* *3 credits*
This course is intended to cover the practical problems of every day living encountered in marriage and family living. The major focus of attention will be given to the preparation for marriage, selection of a partner, financing the marriage, harmonies and discords in the marriage, problems of parenthood and family administration, family crises and ways of meeting them, and the successful and happy marriage and family union. Restricted to seniors.
Fall each year

Soc. 111. *Urban Sociology* *3 credits*
A sociological analysis of the development and effects of modern urbanization on human institutions, population trends and social relationships. The external interrelationships, form and structure and organized life in cities, patterns of urban structure and cities of the future. The role of politics, social agencies and elements making for organization and disorganization. Urban planning and redevelopment.
Spring 1959

Soc. 112. *Methods and Techniques of Social Research* *3 credits*
Ways of obtaining, recording, interpreting, and publishing research materials; the case study, life history, survey, questionnaire, interview, and the use and interpretation of statistical procedures.
Fall each year

Soc. 113. *Juvenile Delinquency* *3 credits*

Juvenile delinquency as a social problem. Methods of treatment and prevention, including juvenile courts, clinics, probation, parole, correctional institutions, child placement and recreational programs.
Fall 1959

Soc. 114. *American Minority Groups* *3 credits*

A study of the cultural background distribution, assimulation and other adjustments of minority groups; along with a survey of the problems arising from the contacts of these people who differ as to race and culture. The concepts of prejudice and discrimination as opposed to the democratic ideology will be considered. This course is an attempt to arrive at an understanding of the American race problem and sociological approaches to the reduction of intergroup hostility.
Spring 1959

Soc. 120. *Special Problems* *1 credit*

General prerequisites, senior standing, sociology major, and permission of the instructor. Done on an individual basis. Assigned readings, individual research, informal conferences and written reports. Individual has choice in field of sociological study.

A. Sociological theory
B. Race relations
C. The family
D. Research methodology
E. Criminology and Penology
F. Anthropology
G. Social Psychology
H. Educational sociology
I. Social Organization

Spring each year

DEPARTMENT OF THEOLOGY

Fr. Herlihy, S.J., *Chairman*; Fr. Erhart, S.J., Fr. Gallagher, S.J., Fr. Lagomarsino, S.J., Fr. Osterle, S.J., Fr. Trundle, S.J.

The program in theology at the University of Scranton has been organized upon the fundamental principle that theology is something vital, which must be lived as well as understood. It is not intended to train theologians but rather to form thoroughly enlightened and strongly motivated Catholic gentlemen, bent upon attaining their full stature in the Mystical Body of Christ.

Theol. 1. *The Quadriform Gospel* *2 credits*

The origin and literary type of the Gospels, source books of Christian origins, their historical and religious value. The structure, content and characteristics of each of the four Gospels in its entirety.

Fall each year

Theol. 2. *The Life of Christ* *2 credits*

The life of Christ and the work He came to accomplish as revealed in a harmony of the Gospels, with commentary. The manifestation of the Divine Person Who is God and Man. Emphasis on His teaching and redemptive missions and His example as a model of Christian personality.

Spring each year

Theol. 21. *Theology of the Incarnation and the Redemption* *2 credits*

The creation, Elevation, and Fall of Man; the Incarnation and its redemptive purpose studied theologically both from Tradition and Sacred Scripture; Mariology, the Sacrifice of the Cross, and the Sacrifice of the Mass studied dogmatically and liturgically; participation in the priesthood of Christ through Baptism, Confirmation and Holy Orders.

Fall each year

Theol. 22. *The Organization and the Inner Nature of the Church* *2 credits*

Origins of the Church as depicted in the Gospels, the Acts of the Apostles, and St. Paul's Epistles to the Corinthians, Colossians, Philippians, and Ephesians. Function of the Church as the continuation of the Incarnation of Christ; its constitution, its teaching office, and the sources of its teaching. The inner nature of the Church as the Mystical Body of Christ, and the role of the Holy Spirit, its Soul, as seen in the scriptural sources and the Papal Encyclicals and the Mystical Body of Christ. A survey history of the Church with particular emphasis on the views of Protestant denominations concerning the nature of the church of Christ.

Spring each year

Theol. 101. *The Theology of the Individual* *2 credits*

Man's progress toward God; Divine Providence; the Indwelling of the Holy Spirit in the just; actual and habitual grace; infused virtues and gifts. The teaching of St. Paul on justification in the epistles to the Romans and Galatians. The salvific will of God, and the universality of His grace. Predestination. The nature of efficacious grace. The grace of Final Perseverance. Penance, Indulgences, Extreme Unction. The four last things, with emphasis on the Beatific Vision, and its object, the Triune God.

Fall each year

Theol. 102. *The Spiritual Formation of Laymen, and their Participation in the Apostolate* *2 credits*

Catholic dogmatic truths concerning Christian perfection applied to the life of laymen with the aim of promoting their spiritual life and their participation in Catholic Action:

(1) The nature of Christian perfection and the obligation of striving for it. The theological virtues, especially Christian charity, and its exemplification by Christ; also the moral virtues, and the relation of natural virtues to supernatural. Practical aspects of the theology of the Sacraments of Penance and the Eucharist. The ascetical practice of mortification and penance, techniques for resisting temptations, methods of prayer, the invocation of angels and saints, Catholic devotions.

(2) The Theology of Catholic Action. The modern role of laymen as mediators between the temporal and spiritual orders, consequent on the rise of Liberalism and Secularism. The collaboration of the laity and the clergy in the Apostolate of Christ. The stages of the lay Apostolate, and the practical organization and method of Catholic Action.

Spring each year

Theol. 110. *The Catholic Philosophy of Religion* *2 credits*

The fact, the universality, the nature, and the origins of Religion. The multiplicity of religions, and of religious errors. The validity of religious knowledge natural and supernatural, and the criteria of supernatural revelation. The evidence for the genuinity, integrity, and historicity of the Gospels, and of the claims of Christ regarding Himself. The continuity of the Roman Catholic Church with the "Primitive" Christian Church, and its development in the organization and doctrine.

Fall each year

Theol. 111. *Christian Marriage: The Church and the Social Order* *2 credits*

(1) The Divine Institution, the essential properties, and the Sacramentality of Christian Marriage; its blessings (Children—love—holiness). The errors and vices opposed to it. Morals for the married, and the Canon Law of the Church concerning marriage.

(2) The Christian social, economic, and cultural program in the temporal order, chiefly as enunciated in the Papal Encyclicals and other pronouncements on topics such as the family; education; relations between Church and State; ownership, property, labor, security, wages; religious toleration, and interdenominational relations, etc

Spring each year

Faculty Directory

ADMINISTRATIVE AND PROFESSIONAL STAFF

Joseph Barrett — 321 Chestnut Street, Peckville
Assistant Director of Guidance; Lecturer in Education and Psychology
B.S., M.A., University of Scranton

Peter A. Carlesimo — 444 Jefferson Avenue—10
Director of Athletics; Coach of Football
B.S., Fordham University

Joseph Ciabocci — Rear 139 River Street, Jessup
Executive Secretary of Alumni Association
B. S., University of Scranton

James T. Doherty — 303 Dudley Street, Dunmore—12
Director of Guidance; Lecturer in Education and Psychology
A.B., M.S., University of Scranton; M.A., Bucknell University

Marie C. Druffner — 527 Grove Street, Avoca
Director of Food Services
A.B., College of St. Elizabeth

John A. Finnegan — 1351 Penn Avenue—9
Registrar
B.S., M.S., University of Scranton

John R. Gavigan — 322 Monroe Avenue—10
Director Placement Service and Public Relations
A.B., University of Scranton

William G. Kelly, S.J. — University of Scranton—10
Vice- President; Dean of the University
A.B., Ph.L., M.A., St. Louis University; S.T.L., Woodstock College

Louis C. Kleff, S.J. — University of Scranton—10
Treasurer
A.B., M.A., Woodstock College

Joseph P. Logan, S.J. — University of Scranton—10
Assistant to the President
Ph.L., S.T.B., Woodstock College

John J. Long, S.J. — University of Scranton—10
President of the University
A.B., M.A., Woodstock College; Ph.D., Gregorian University, Rome; LL.D., La Salle College, Villanova University

John P. McGoldrick — 1055 Blair Avenue—8
Engineer, Station WUSV-FM
B.S., Pennsylvania State University

John B. McGee, S.J. — University of Scranton—10
Dean of Admissions
A.B., Georgetown University; Ph.L., M.A., S.T.B., Woodstock College

Marianne McTighe — 217 Wheeler Avenue—10
Librarian
B.S., M.A., Marywood College

Edward J. Mullally, S.J. — University of Scranton—10
Dean of Men
A.B., St. Joseph's College; Ph.L., M.A., Bellarmine College;
S.T.B., Woodstock College

Mildred A. Norton — 1219 Schlager Street—4
Assistant Librarian, Head of Order Department, Library
B.S., Marywood College

Frank J. O'Hara — 901 Woodlawn Street—9
Assistant to the President; Director of Alumni Relations
A.B., LL.D., University of Scranton; M.A., La Salle College

J. Frank Reddington, M.D. — 409 Prescott Avenue—10
College Physician
A.B., Holy Cross College; M.D., Georgetown University

Donald C. Reilly, S.J. — University of Scranton—10
Administrative Assistant to the President
A.B., Georgetown University; M.A., Ph.L., S.T.L., Woodstock College

Joseph A. Rock, S.J. — University of Scranton—10
Dean of Evening and Graduate Sessions
A.B., M.A., Georgetown University; Ph.L., Woodstock College;
S.T.L., Weston College; Ph.D., Georgtown University

Robert T. Ryder — 925 East Drinker Street, Dunmore—12
Comptroller
B.S., University of Scranton

Angelina T. Scardamaglia — 801 Woodlawn Street—9
Assistant Librarian, Head of Cataloging Department, Library
A.B., B.S. in L.S., Marywood College

Donald A. Van Slavich — R. D. 1, Falls, Pa.
Assistant Director, Admissions Department
B.S., University of Scranton

Mrs. Virginia Walsh — 335 Palm Street—5
Recorder

Anthony G. Webber — 1554 Capouse Avenue—9
Manager of Bookstore
A.B., St. Michael's College; A.M., University of Notre Dame

INSTRUCTIONAL STAFF

Louis J. Aebischer, Lieutenant Colonel, U. S. Army — 1047 Clay Avenue—10
Professor of Military Science and Tactics
B.S., M.S., Syracuse University

Martin D. Appleton — 417 Main Street, Childs
Assistant Professor of Chemistry
B.S., University of Scranton;
M.Sc., Cand. Ph.D., Pennsylvania State University

John J. Baldi — 901 Richmont Street—9
Associate Professor, Chairman Department of Social Sciences
A.B., M.S.S.W., Boston College

Edward F. Bartley — 1115 Fisk Street—9
Associate Professor, Chairman Department of Mathematics
A.B., University of Scranton; M.A., Cand. Ph.D., Columbia University

Joseph E. Beezup — 105 Fairview Avenue, Clarks Summit
Lecturer in Engineering
B.S., Pennsylvania State University

Donald V. Belaski
Instructor in Mathematics
B.S., Michigan State University; M.A., University of Detroit

John E. Bourne — Waverly, Pa.
Professor of Education and Psychology
A.B., St. Anselm's College; Ed.M., Boston College;
Ed.D., Harvard University

John B. Brady, Major, U. S. Army — 106 Horseshoe Drive, Moscow
Instructor in Military Science
B.S., U. S. Military Academy, West Point

Patrick T. Brannan, S.J. — University of Scranton—10
Instructor in Classical Languages
A.B., M.A., Fordham University; Ph.L., Woodstock College

Frank C. Brown — 307 Harper Street, Dunmore—12
Associate Professor, Chairman Department of History
A.B., University of Scranton; M.A., Columbia University

Charles J. Buckley — 225 Stephen Avenue—5
Assistant Professor of Business Administration
B.S., University of Scranton;
M.B.A., Cand. Ph.D., New York University

Stephen J. Budash — 1717 Monroe Avenue, Dunmore—9
Lecturer in Education
B.S., University of Scranton; M.A., Bucknell University

Umbay H. Burti — 215 East Morton Street, Old Forge
Assistant Professor, Chairman Department of Chemistry
B.S., University of Scranton

Francis X. Budovic, S.J. — University of Scranton—10
Assistant Professor of Modern Languages
Ph.L., University of Trnava, Czechoslovakia;
S.T.L., Gregorian University, Rome

John J. Callaghan — 1828 North Main Avenue—8
Assistant Professor of Biology
B.S., M.S., University College, University of Cork;
Cand. Ph.D., Pennsylvania State University

Joseph M. Cannon — 2005 Rigg Street, Dunmore
Instructor in Education and Psychology
B.S., University of Scranton;
M.Ed., Cand. D.Ed., Pennsylvania State University

Paul J. Casey, S.J. — University of Scranton—10
Assistant Professor of Chemistry
B.S., Ph.L., Spring Hill College; S.T.B., Woodstock College;
M.S., University of Detroit

Ambrose G. Charnogursky — 1333 Jefferson Avenue, Dunmore—10
Lecturer in Business Administration
B.S., University of Scranton

Stanley L. Chickson — 85 Woodbury Street, Wilkes-Barre
Assistant Professor of Engineering and Mathematics
B.S.C.E., Pennsylvania State University; M.S., Bucknell University

Frank A. Cimini — 1519 Jefferson Avenue, Dunmore—9
Assistant Professor, Chairman Department of Modern Languages
A.B., University of Scranton; M.A., Fordham University

John J. Clarke — 611 Monroe Avenue—10
Lecturer in English
A.B., University of Scranton; M.S., Columbia University;
Ph.D., Brown University

George E. Connolly — 403 North Webster Avenue—10
Instructor in Philosophy
A.B., Loyola University, Chicago;
M.A., Cand. Ph.D., St. Louis University

Patrick J. Cowley — 920 Front Street—5
Lecturer in Real Estate Courses

Joseph B. Cullather — 1114 Division Street—4
Assistant Professor of English
A.B., University of Scranton; M.A., University of Alabama

Ruth D. Davies — 344 North Garfield Avenue—4
Lecturer in Education
B.S., University of Rochester;
M.M., University of Southern California

William M. Donovan — 444 Orchard Street—5
Lecturer in Business Administration
B.S., University of Scranton

James A. Driscoll — 404 North Apple Street, Dunmore—12
Assistant Professor of English
A.B., University of Scranton; M.A., Bucknell University

Donald E. Duffy — 210 Chestnut Street, Dunmore—12
Instructor in Physics and Mathematics
B.S., University of Scranton; M.S., New York University

Henry J. Erhart, S.J. — University of Scranton—10
Instructor in Theology
A.B., M.A., Ph.L., Boston College; S.T.B., Woodstock College

Alice L. Evans — 144 School Street—8
Lecturer in Education
B.S., M.Ed., Pennsylvania State University

Joseph T. Evans — 46 Maltby Avenue, Swoyersville
Associate Professor of Biology
B.S., University of Scranton; M.S., Ph.D., Catholic University

James A. Fitzgerald — 1103 Pine Street—10
Professor of Education
B.A., M.A., University of South Dakota; Ph.D., University of Iowa

Eugene B. Gallagher, S.J. — University of Scranton—10
Professor of Theology
A.B., Ph.L., M.A., S.T.L., Cand. S.T.D, Woodstock College

Francis J. Gallagher, S.J. University of Scranton—10
Associate Professor of History
A.B., M.A., S.T.L., Woodstock College

Joseph E. Gallagher 1112 East Gibson Street—10
Lecturer in History
A.B., University of Scranton; LL.B., Fordham University

Terrence F. Gallagher 1516 Cedar Avenue—5
Lecturer in Art and Education
A.B., Saint Thomas College

James F. Gibbons, S.J. University of Scranton—10
Associate Professor of Philosophy
A.B., M.A., Loyola University, Chicago; Ph.L., West Baden College;
S.T.L., Woodstock College

Richard F. Grady, S.J. University of Scranton—10
Professor, Chairman Department of English
A.B., St. Joseph's College; M.A., S.T.L., Woodstock College;
Ph.D., Gregorian University, Rome

Joseph P. Harper 836 Taylor Avenue—10
Professor, Chairman Department of Physics
B.S., St. Edward's University, Texas; M.A., Ph.D., University of Texas

G. Gordon Henderson, S.J. University of Scranton—10
Assistant Professor of Psychology; Student Counselor
A.B., Georgetown University; Ph.L., Weston College;
M.A., M.Ed., Boston College; S.T.L., Woodstock College;
Cand. Ph.D., University of Ottawa

William V. Herlihy, S.J. University of Scranton—10
Professor, Chairman Department of Theology
A.B., M.A., S.T.L., Woodstock College

Donald J. Higgins 403 North Webster Avenue—10
Instructor in English
A.B., St. Mary's College, Minnesota; M.A., Loyola University, Chicago;
M.A., University of Notre Dame; Cand. Ph.D., University of Ottawa

John J. Holst
Instructor in Mathematics
B.S., U. S. Military Academy, West Point;
M.S., Purdue University

Daniel J. Houlihan 143 Constitution Avenue, Jessup
Associate Professor of Business Administration
B.S., University of Scranton; M.S., Columbia University;
LL.B., Temple University

Edward A. Jarvis, S.J. University of Scranton—10
Assistant Professor, Chairman Department of Philosophy
B.A., M.A., Ph.L., S.T.L., Woodstock College;
Cand. Ph.D., University of Ottawa

William P. Joyce 1006 Linden Street—10
Lecturer in History
A.B., University of Scranton; M.A., Georgetown University

William E. Katorkas 1345 Wyoming Avenue—9
Instructor in Business Administration
B.S., University of Scranton

Joseph F. Kenkel
Instructor in History
A.B., Catholic University; M.A., Cand. Ph.D., University of Maryland

John F. Kenny 129 Division Street, Kingston
Lecturer in Education
B.S., State Teachers College; M.A., Ed.D., Columbia University

James A. Kilker, Jr.
Assistant Professor of Modern Languages
A.B., University of Missouri;
Certificate d'etudes etrangeres, Sorbonne;
M.F.S., University of Maryland; Cand. Ph.D., University of Missouri

James D. Kilker 214 Church Street, Jessup
Lecturer in Business Administration
B.S., University of Scranton

Mrs. Eleanor Krajewski 604 Dundaff Street, Dickson City
